From: Craig Rose
Topic: 9 Message: 10

Fast action by SAN JOSE ENGINE COMPANY 31 - "put the wet stuff on the red stuff" leading to a non-event. Fire started after juveniles threw a "smoke bomb" into one of the cypress trees. Checking roofs for embers, but looks totally under control.

There was also an earlier Full First on Curtner Avenue for a kitchen fire, but that turned out to be a another simple affair with ENGINE COMPANY 6 extinguishing a small kitchen cabinet fire that did not extend.

Good evening all. Worked a 2nd alarm structure fire in a four-unit, two-story apartment building on Payne Avenue and San Tomas Aquino in west San Jose this morning. San Jose Station 14 is only about two blocks from this location allowing for a VERY quick knock down of the fire. Truck 14 had cut the roof within about five minutes and by the time I arrived the event was +15 and well in-hand.

Regardless, here are some pics for your consideration.

18. Colma

Yahoo group: BayAreaFire
Date: 2006-02-11 04:06:11 UTC
From: Ed
Topic: 18 Message: 18

According to the SF Examiner , Colma is looking to outsource Fire protection as they presently use part-time fire fighters and since their responses have tripled over the last 10 years , they are finding it harder to get these people to respond to as many as 3 calls in the middle of the night and money , as usual , is a problem

They have talked to South San Francisco and may talk to North County Fire Authority in the future.

I suspect they will almost for sure go to one or the other as they will be unable to continue to provide protection without at least a few full time fire fighters.

South County , on the other hand , will probably be broken up with Belmont forming their own dept and San Carlos outsourcing to either San Mateo County, San Mateo City or Redwood City Fire Dept. Money , here too , a big problem for San Carlos.

Ed

South County was formed in 1978.

Belmont had two or three engines and one truck. San Carlos had 2 engines and a Mini pumper. South County had 4 engines, one rescue, and one truck. They have less now.

Many issues, especially funding is the issue. Belmont and San Carlos each pays 50% For Fire protection. Basically, according to the San Mateo Times,Belmont says the get less calls for service and should pay less.

27. Aircraft Down - East San Jose

Yahoo group: BayAreaFire
Date: 2006-02-13 00:26:42 UTC
From: Craig Rose
Topic: 27 Message: 27

Afternoon all -

Just returned from a light plane crash on Tully Road at Eastridge Way. This was a pretty amazing incident in that NO ONE was injured! If you have ever driven around the Eastridge area you may know how congested it can be. Today was like most other days - heavy traffic on Tully Road, both east and westbound.

The call came in as a small single engine aircraft down with vehicles being hit on Tully Road. In fact, the aircraft had initially touched-down in a grassy open area and proceeded to skid onto eastbound Tully Road where it missed hitting any cars! The pilot and passengers were unscathed as well. Cause of the crash was possible pilot after the aircraft ran out of fuel on short final for landing at the airport.

RESPONDING UNITS:

ENGINE 16
ENGINE COMPANY 24
USAR 16
USAR TENDER 16
BATTALION 2

Time of call was 1456 hours and the incident was worked on San Jose Command 3 - 154.115

Photos coming soon!

Cheers!

Craig

They used to all be that color , back in the 50s and prior to that , it maybe being done as a tribute to the SFFD lads in 06' .

I hear American La France bought out Spartan/LTD so any new trucks maybe ALFs also.

Yep , Paul is right , means Paramedic Engine. I wonder why Palo Alto doesn't have ALL Engines as paramedic Engines and the Truck and Rescue as well considering PAFD has been running their own Paramedic transports for over 30 years . You would think they would have enough people trained ALS to cover all shifts and all apparatus.

Hey guys , just got my copy of FireApparatus Journal.....article

states that thru a grant from Homeland Security , S.Clara County has

received 3 new Breathing Support / Light units. They are said to be

stationed in Palo Alto , Santa Clara City and County. Anyone know of

these new units ?? they carry a number of extra bottles and can

can refill SCBAs for any type so they are real good for Mutual Aid.

All have light towers and large compressors.

Hey guys - was at this fire after a roughly 18 minute journey from Santa Clara to downtown San Jose. This was an awesome save. Truck 1 arrived on scene and reported flames blowing out the D side of the structure and immediately called a 2nd alarm. They were able to get really aggressive with an interior attack and stop this one before it went too far. 3rd alarm was precautionary. I have photos, but by the time I arrived on scene - well - you know the rest of the story. I did get a lot of great people shots.

More on this one later.

From: jawsj@webtv.net
Topic: 86 Message: 91

I responded in Fire Support Unit 2 and got there almost an hour after the report (page out at 3rd alarm, travel time to pick up the unit, travel time to the fire). No smoke or fire by then. Craig said it right; a great stop, per BC 1. Had lots of potential. Right across from new City Hall. In fact, the lot where I set up was formerly a Methodist church, which was a multi alarm fire a few years ago. I was there also.

Craig, next time you are at a fire within the county, and Fire Associates is there, come over and see if I responded. Would like to meet you. jw

Hi JW!

Should I just ask for you as JW? I'll be sure to do so!

Here are links to a few shots from this incident. Nothing terribly exciting, but might add a little context for folks that weren't there.

http://tinyurl.com/jgjom

Craig, better ask for me by full name, as there is another John W. If Fire Support Unit #1 is on scene, I probably won't be there. I usually am with #2 or #3.

We have pictures of the rigs under the County fire web page. See sccfd.org, then look for Fire Associates as a supporting agency.

I know some of the people in your photo album you just sent. John

firedispatch.com is having a problem with Palo Alto dispatches

early this morning it put out a 2nd alarm at the Sheraton Hotel at

625 El Camino Real. I monitored this fire and it was NOT a 2nd alarm ,

It was a 1st alarm (commericial type dryer on 1st floor) They also

showed an EMS call at the same hotel about an hour later that didn't

happen.

so take the Palo Alto stuff , for the time being , with a grain of

salt and monitor the call and double check them before running out

the door !!! LOL

From: Craig Rose
Topic: 107 Message: 107

There are a lot of great FD websites out there, but I have to commend the Manassas Volunteer Fire Company (Virginia) for doing a really great job on their site. If you go to their page and scroll down to the third incident listed, you can click on a link for a 10 minute video. I won't give away the surprise, but it's pretty dang cool to watch - especially for those folks that don't have an opportunity to experience firefighting up close.

If interested, check it out here:

http://www.manassasfire.com/

Cheers!

Nice find Craig. I wish any or all of the big 3 depts

here (SFFD, SJFD or Oakland) had better websites. I think the 2 best

local ones are San Ramon and Santa Clara County. I surf the net
fairly

often looking for good ones. If anyone find real good ones like Craig

did, PLEASE , by all means post it here :-) Thanks

Ed

BTW , does anyone know of someone who has good videos of local

fires on DVD for sale.....BRIAN ????????

Canceled. The "Jumper" was talked off the railing by the CHP.

Q: What do they need all the equipment for? The Coast Guard picks up the body or IF they survive "Victim" and then take them to Station Golden Gate on the Marin side. Southern Marin Fire would be the ones to help the victim if anything.

By the time the SF Fireboat get there it's over anyway

I agree Paul , it is a massive response. But to clear part of it up

The Presidio units are the closest , E16 and T16 respond and bring the

Jet-Skis with them. Now I am not sure what the procedure for RS1 is , I have

heard them go over to Pier 22-1/2 and help staff the Fireboat with divers.

Now today they went directly to Fort Point . RS2

also probably has divers so they also go. BC11 is the PFD chief but they also

want SFFD Chiefs so usually BC4 goes and as with today Division 2 went.

They seem to want as many " boats" searching so FB1 goes along with

whatever resources the USCG sends. As far as where the victim is transported

to , depends on where they get them. One of the recent calls actually turned out

to be a beach rescue and they transported him to Medic 51 in the Presidio.

The Presidio units are the closest Yes

E16 and T16 respond and bring the Jet-Skis with them. Yes

Both Rescues for enough qualified divers and for backup divers in case guys get stuck.

SFFD Chiefs to run SF Operations and Safety operations

first unit there can always cancel everybody else.

137. Something Different

Yahoo group: BayAreaFire
Date: 2006-04-23 16:04:05 UTC
From: Craig Rose
Topic: 137 Message: 137

Just arrived back in town after an intense tour of the middle south states. The trip began in Dallas, Texas, continued on to Oklahoma, Arkansas, Mississippi, Alabama, Tennessee, and finally ended in Lexington, Kentucky. Met folks from many, many fire departments along the way and even wound up doing some work!

When we reached Gallatin, Tennessee, we were greeted with severe, and almost total destruction of a commercial area and residential area that were struck by a tornado. After a quick meeting with the Gallatin PD, I was offered full access to the area to shoot images for training purposes. They were awesome folks that had dealt with nine deaths and 14 looters. Pretty intense stuff and my heart really goes out to these folks. You can dig deeper into this tragedy here -

http://tinyurl.com/zr6fw

I have also thrown in a couple of apparatus shots for us buffs.

And because I am totally exhausted from the trip, I clearly can't be expected to remember that the URL will be broken when I copy and paste it from Photobucket ;^)

You can simply copy the whole thing and paste it into your browser's address box. Sorry about that!

SFFD working an unusual incident , Seems a vehicle crashed into

a parked car at 450 Castro and leaking fuel ignited and set off

8 cars and 3 motorcycles ....Engine 6 rolling by themselves

called for both full 1st and 2nd alarms. Seems now the 1st alarm

is handling OUCH, they just now said they have a DOA WHOA

they had another victim going to SF General

A3 or A6 and A15 talkgroups incident still in progress

From: My e-mail
Topic: 167 Message: 169

I didn't see a second truck from the San Mateo County. T85 is not normally counted in, only for Colma responces I think. Sometimes T51 responds into Daly City on a second, instead of a South City Quint. Other times, SSF is counted in. I went to the front of the building first instead of the rear. Most of the fire was in the rear.

From: Ed
Topic: 180 Message: 180

geez , I gotta go back to bed, been up all night ;-)

anyway , OFD working a 3rd alarm at 7th and Perala , 5 story

main post office with heavy fire on 3rd floor and possible extension

into 4th floor . Now knocked down , starting overhaul . ATF on scene

Some rooms are secured , awaiting post office police and ATF

to check rooms

on OFD 2 / TG 530

Hotmail...

This fire reminds me of a fire in Washington DC where they had a Post office fire involving the same building design many years ago.

BTW where is Engine 2554 stationed at? I didn't know Oakland had Engine 14.

Ed,

I think that's out of date. Truck 2 - 2572 is with Engine 4 - 2544.

Truck 1 - 2571 is with engine 1- 2541

Truck 7 - 2577 is with Engine 20 - 2560

Truck 3 -2573 with Engine 3 - 2543

Truck 4 - 2574 with Engine 8 - 2548

Truck 5 - 2575 with Engine 15- 2555

Truck 6 -2576 with Engine 18-2558

Am I right, anybody, where is 2554??? Is that a new company?

I did some surfin' and found Milts' list is probably correct

I incorrectly listed 2554 instead of 2544

found good site

www.oakland13engine.com lists lots of information

and has audio to the 7th alarm last October !! check it out

I am thinking maybe Engine 2554 is a Reserve engine , maybe

out of station 4 ? just a thought

187. SFFD New Engines

Yahoo group: BayAreaFire
Date: 2006-05-21 07:25:51 UTC
From: Ed
Topic: 34 Message: 187

First , thanks to Milt for the pics of the fire in Daly City

which includes the new SFFD Engine 43. In addition to E43 , I just

received my copy of Fire Apparatus Journal and it indicates that

Engines 1,3,5,6.7,10.,11, 36 and 41 are the other nine Engines

that received the new maroon Engines.

It also mentions that San Mateo City FD has a contract with
Pierce

for 2 new Engines and Contra Costa County has received Five new

Type 2 Engines in their wildland/urban interface stations. anyone

have any idea of where they will be ?? It appears CoCo will
replace

having both type 1 and 3 Engines in some houses and replace the

two rigs with one Type 2 Engine ..obviously saving money

Ed

On the SF Engines, not all the rigs have been assigned and in service. Only Engines 3, 5, 7, 10, 11, and 43 are in service. There other rigs are not in service yet. Companies are still using their original rigs. The remaining ALF pumpers are being refitted, outfitted, etc.

As some of you may or may not know, the CDF operates a web site that serves their Lassen-Modoc unit solely. WWW.CDFLMU.ORG I found this site about a year ago. If you look at it you'll notice it looks just like the CDF site.

If this was a test web site, it must have pleased the hierarchy. I typed in WWW.CDFSCU.ORG, and sure enough, the Santa Clara Unit will have their own website coming soon!

When something like that is going on listen to 143.280Mhz. It's the Coast Guard Auxiliary's remote repeater. Located on Mt.Diablo it is able to monitor the active Marine channel to hear the whole story. It can monitor 09,16,21A,22A,23A,81A and 83A.

We had it monitoring today during the search.

Coast Guard Helo's 6516 and 6534 were up searching for the 2 teenagers missing. There was also 3 Auxiliary Land Mobile units and a 25 ft SAFE Boat from Station San Francisco.

Luckily the boys came out ok and found their way to shore. They were in the water for 4 hours and VERY cold but Ok.

That's impressive... but my point was... this is a free country and a free group or at least it used to be... So go threaten someone else... or better yet why don't you start your own fascist bayscan yahoo group and you can censor it all you want. Again who the f are you??? I've can't remember one thing you have posted to actually contribute to the group. Why don't you do us ALL a favor and unsubscribe. Let me guess you don't even own a scanner...

they got water on it from above and below , RS1 crew donned

wetsuits and went into the drink with a 1-3/4 line , Engine 13 got it from above

they wanted the jetskis from T16 and wanted to use jackhammers so they

got the Tech. RS from 39Engine. When they declared it a Working Fire , they

added one Engine (missed the number) as usual AND HT25 ....guesss they do

that for Pier Fires because of possible long leads..... they held it to a 1st alarm

plus the special calls

Ed

Ed, hit this one and was there for the duration. Tough battle with multiple flare-ups. This fire started in the home, blew out the bravo side of the structure and sparked the detached garage and another separate building.

> San Jose now working a 2nd alarm at 1465 Norman , Station 4s area
> fully involved garage + vehicles . this one is still in progress
> Command 3

Another nasty fire with the garage fully involved on my arrival. The bravo side was the critical exposure on this fire. The neighboring single family dwelling was at risk, but SJFD did a nice job of getting well ahead of the fire.

> Calling a Tier 1 fire area of Bernal and Santa Teresa

Left the structure fire on Norman after getting paged to this one. BUSY DAY! Last I heard was five acres with a unified command CDF/SJFD. They had a significant response from San Jose and were able to limit the size of this fire. COPTER 106 did quite a bit of the "heavy lifting" on this fire.

Pictures to follow.

Ed,

Sorry for all of the background on RIC vs. two-in, but I figure some folks might not be totally familiar with these terms.

The policy of two-in, two-out mandates that firefighters never go into a dangerous situation in a fire or rescue incident alone. There should always be (at least) two firefighters together when they enter a location and one of them cannot come out of the situation or building unless both do. The policy also refers to a safety system put into place in order to protect firefighters, where two or more firefighters enter a building and at least two more remain outside, ready to help in case of emergency.

The two firefighters who are specifically designated as standing by outside are referred to in different ways by many localities. Some are referred to as a rapid entry team (R.E.T.), or "rapid intervention team", while others are referred to as a F.A.S.T. Truck (as in the Fire Department of New York), meaning "firefighter assist search team".

As for RIC (or RIT), one of the critical differences is the size (personnel) and equipment available for deployment. The RIC team for some departments is based on a four person team, while some departments allow for a two person team. The other key difference between two-in and the RIC generally comes down to the available equipment. SJFD uses a staging mat that has the outlines of the essential RIC gear. Here again, each department seems to have their preferences and SOPs as pertains to the necessary tools.

Hope this wasn't TMI - too much information ;^)

Cheers!

Craig

Ed, thanks for the kind words regarding the pics.

By the way, I should say that much of the RIC vs. two-in information came from research on rapidintervention.com and wikipedia - I had the exact same question regarding the difference between the two.

The more info. the better , thanks let me add a question

I know the RIC team of course has all their PPE and SCBAs on , but

what " tools" do they have , I would assume force-able entry tools but I have

also seen or heard of a RIC bag ? any ideas ?

-------------- Original message --------------
From: Craig Rose <craig@...>

Ed,

Sorry for all of the background on RIC vs. two-in, but I figure some folks might not be totally familiar with these terms.

The policy of two-in, two-out mandates that firefighters never go into a dangerous situation in a fire or rescue incident alone. There should always be (at least) two firefighters together when they enter a location and one of them cannot come out of the situation or building unless both do. The policy also refers to a safety system put into place in order to protect firefighters, where two or more firefighters enter a building and at least two more remain outside, ready to help in case of emergency.

The two firefighters who are specifically designated as standing by outside are referred to in different ways by many localities. Some are referred to as a rapid entry team (R.E.T.), or "rapid intervention team", while others are referred to as a F.A.S.T. Truck (as in the Fire Department of New York), meaning "firefighter assist search team".

As for RIC (or RIT), one of the critical differences is the size (personnel) and equipment available for deployment. The RIC team for some departments is based on a four person team, while some departments allow for a two person team. The other key difference between two-in and the RIC generally comes down to the available equipment. SJFD uses a staging mat that has the outlines of the essential RIC gear. Here again, each department seems to have their preferences and SOPs as pertains to the necessary tools.

Hope this wasn't TMI - too much information ;^)

Cheers!

Craig

From: Craig Rose
Topic: 258 Message: 258

Haven't been able to get all of the details, but overheard CDF, South Santa Clara County Fire, and Uvas Volunteers working a fully involved 3,500 sq. foot single family dwelling with imminent threat to the vegetation. Incident is on Uvas Road in south Santa Clara County.

This one is working on CDF TAC 2 - 151.160 and CDF LOCAL 151.445

Also, breaking a 5+ acre vegetation fire in the Brentwood area. Last report heard was 5+ acres in the flat, but burning through flashy fuels and heading towards hills.

You might catch traffic on CDF COMMAND 1 - 151.355

Okay, they got the RODDY FIRE contained at 22 acres. I'm afraid this is the proverbial tip of the iceberg for this fire season.

As for the structure on Uvas Road, 100% loss, with several hours of heavy mop up.

Hey Ed,

Sorry I let the ball drop on this thread...here is a bit more
information to consider.

RIC/RIT KIT tool selection varies by department, but here is a
selection of essential items for quick deployment:

1. Various lengths of rescue/utility rope, strapping, with carabineers
on both ends.
2. Flashlights, portable spot, chemical light sticks, strobes.
3. Complete spare SCBA.
4. Various small hand tools including cutters, pliers, etc.

Some of the items to be maintained at the RIC/RIT staging area and not
included in the KIT might be:

1. Air bags
2. Stokes basket
3. TIC
4. Power saws, axe,
5. Irons
6. RIC tarp with tool template for proper placement.

Cheers!

Craig

First, the Uvas fire was only shop buildings, no resident displaced.
Was doing my usual Friday VIP duty (0800-1700) in ECC when call came in.
Woman was very panicked and loud. Heard propane gas was involved. Also
there for Brentwood (Roddy) fire.

As I was leaving Morgan Hill about 1715 I heard an aircraft call NorCal
Approach to say he had a wildland fire off his 11 oclock position at 1
mile. I could not tell which airport he was heading for nor could I see
smoke. Think it was to become the China incident (SCU 3886). Morgan
Hill says they got the call about 1815; I got paged at 1912 to support
the ECC efforts for this fire. Left there at 0115 this morning. Had to
activate Comm 1629, get other VIPs for various staff jobs. We ordered
potties, dumpsters, tents, dozers, tenders, etc., and did many other
tasks for the chiefs as they made plans.
For example, at midnight, logistics needed 600 meals ordered and
delivered by 0600. That surely kept some company busy!!

Fire Camp is at Ann Sobrato High School just N of MH, off Burnett at
Monterey Road, N of Cochran Road. Camp kitchen and support was due in
this morning.

Using CDF 2, MH local, air tactics 22, and CDF tac 2. Latest update
this morning was 200 acres. John

Thanks John , later on in the morning , I heard an update

of 300 acres but then reduced to 150 after the IC walked around

the line. Overnight crews did a great job and pretty much had it

surrounded by 0600. I am sure its probably in mop up stage at

this time

Topic: 277 Message: 277

Burn Injuries, Immediate and Aftercare -

On Saturday, August 5, 2006, from 10:00 a.m. until 2:00 p.m., the Asiya Shrine Temple of San Mateo will sponsor a free screening clinic for admission to the Shriners Hospital at the Marin City Community Services District Health Clinic, located at 630 Drake Avenue, Sausalito, CA 94965.

Screening will be performed by volunteer doctors from the community to determine whether the child has a condition that can be treated free of charge at a Shrine Hospital. The clinic will enable local children and their families avoid unnecessary long-distance travel to a Shriners Hospital in order to determine medical eligibility.

The types of conditions treated are: Scoliosis and spinal deformities, clubfoot and related deformities, osteogenesis imperfecta, spina bifida/myelodysplasia, neuromuscular disorders, hand problems, hip disorders, orthopedic problems resulting from cerebral palsy, missing limbs/limb deficiencies, leg length discrepancies, metabolic bone disease, skeletal growth abnormalities, spinal cord injuries, and burn injuries.

Shriners Hospitals for Children is a network of pediatric specialty hospitals, founded by the Shrine, where children under the age of 18 receive excellent medical care absolutely free of charge.

See, http://mill-valley.freemasonry.biz/shriner_hospital_screening.htm

Craig , thanks for the updates on the Del Valle fire.

Seems there maybe a arson working out the Marsh Creek

area by CDF Sunshine station , couple more fires overnight.

Guys , lets not limit outselves to fires. I would like to

see major MVAs posted as well since they involve more than one

fire unit. Please post MVAs if they have any of the following

1) MCI Alert
2) Confirmed entrapment
3) 11-44 / 10-55 (Fatal) (802 in SF)
4) Request for Helicopter(s)

Thanks
Ed

351. [CDF SCU] CANYON IC - 2045HRS Update

Yahoo group: BayAreaFire
Date: 2006-07-10 04:32:18 UTC
From: Craig Tomasello
Topic: 351 Message: 351

Again I apologize to anyone whom didn't understand my first few posts as to the location of this fire.

SCU = Santa Clara Unit
Del Puerto Canyon = A rural area of Western Stanislaus County and extreme eastern Santa Clara County. This entrance to this area is just west of Patterson, CA near I-5 and Sperry Rd. , about 40 miles SW of Modesto, CA. This area is known for it's fires due to high winds that whip over the Mt Hamilton range. Which tonight are blowing from the east and I can see the smoke drifting over to San Jose from this fire. This is a steep terrain area with heavy fuels.

FROM THE CDF SITE: 0% containment approx. 500 acres No command team has been designated yet.

On a side note: We have a cover Dozer from the SLU (San Luis Obispo Unit).

Hey guys - just cleared from the scene and arrived at home about 20 minutes ago. What a day! I did get a few photos - like 600! I was called out to the Del Puerto Canyon Fire to do some photo work when I was paged to the Pruneridge Fire. I hadn't gotten out of the city when my pager went off. I zipped over there, checked-in with IC, and started the survey. I'll try and have a selection of photos up tonight, but no guarantees. I am exhausted! The radiant heat from this fire was astonishing. Fire had one heck of a head start, but when it ripped through the tile roof, that was the end of the interior attack. Okay, need to shower, have a ton of water and eat some supper - then photos.

BTW - for those interested - you can see another Santa Clara Fire incident - Alpine Avenue Residential Structure Fire - at Firehouse.com:

tinyurl.com/pr5lb

More to come!

Craig

From: Ed
Topic: 351 Message: 369

Well, since I am UP ....(0400) Last I heard an acreage

was 2300 hours and it was 650 , sure its more now. They want two

strike teams type 1 Engines for structure protection at some golf

course by 0500 hours. For morning they want the following

Six Strike Teams type 3 Engines

Six Helos of which 2 are type 1 , 3 type 2 and One type 3

Four Air tankers

Ten Strike teams of hand crews

Eight Divisional supervisors ...

I have heard (earlier) two local gov strike teams , one Stanilaus

and one Alameda (XAL 2004) these were way prior to the request for

the type 1s for the golf course. So there should be 2 more.

Date: Wed, Jul 12, 2006, 10:52pm (PDT+3)
Subject: CA-SCU-4303 CANYON Fire Update...
The Midway (I-580) fire yesterday afternoon was 6,400 acres before being 100% contained by 2130 last night.

INCIDENT STATUS SUMMARY (ICS-209) 07/12/2006 @ 1800

Incident Number CA-SCU-4303
Incident Name: CANYON
Start Date/Time 07/09/2006 1555
Incident Commander Bernie Paul (IMT Type 1) Latitude and Longitude Lat: 37Â° 26Â′ 10" Long: 121Â° 19Â′ 18" Short Location
Description: DEL PUERTO CANYON/W OF PATTERSON
CURRENT SITUATION
Size: 16,665 ACRES 30% Contained
Expected Containment Date/Time: ???
Line to Build: 32 MILES!
Cost to Date: $3,054,871.00
Structure Information:
    7 Structures destroyed, 1 Outbuilding destroyed 30 Residence threatened, 50 Outbuildings threatened
Communities/Critical Infrastructure Threatened (Next 12-72 hours): Lion Canyon, Orestimba Creek, Santa Clara Co, Henry Coe Park, Gooseberry Canyon, Isom Ranch, San Antone Valley, residential, ranches, rangeland and watershed
Critical Resource Needs (kind & amount, in priority order):
    1. Dozers / 2. Engines / 3. Operational Overhead & Handcrews
Major problems and concerns:
  Difficult access with steep terrain,
    lack of a steady and reliable water source and insufficient resources. Active fire burning in Stanislaus County and into Santa Clara County, approaching Henry Coe State Park, and into Isom Ranch area. Residential and Ranch properties continue to be at risk. Voluntary evacuations in active fire areas are in place. Heavy smoke has inhibited air operations over the fire.
Resources threatened:
    Henry Coe Park, San Antone Valley, residential properties, grazing land, watershed and wildlife habitat. Valuable hunting and recreational facilities potentially at risk which may destroy critical game habitat and loss of business revenue.
Current Weather Conditions
    Wind Speed:7G12 mph / Temperature:75 / Wind Direction:NE / Relative Humidity:40
Fuels/Materials Involved: Chaparral (6 Feet) Light flashy fuels and brush.

Today's observed fire behavior:
    Erratic winds, significant runs with spotting and torching.
Significant events today:
    Fire crossed over Santa Clara and Stanislaus County Road
moving into the San Antone Valley and south towards the Henry Coe State
Park. Del Puerto Canyon Road remains closed to civilian traffic.
OUTLOOK
Estimated Control Date/Time: 07/15/2006 2300 Projected Final Size:
20,000 ACRES
For fire incidents, describe resistance to control in terms of:
    1. Growth Potential - Extreme
    2. Difficulty of Terrain - Extreme
REMARKS:
    Fire continues to burn within areas with no significant fire
occurance in over 50 years and in and amongst residential and ranch
properties. Active fire now burning in Santa Clara County and
approaching Henry Coe State Park.
    Three reported injuries to date - heat related (minor)
Committed Resources 1797 Total personnel 144 Engine Companies
    29 Dozers
  52 Hand Crews
  15 Water Tenders
  13 Helicopters
  4   Air Tankers
  5   Camp Crews
  174 Overhead

Well , KRON said they were going south and if you look at
firedispatch.com it shows the 2 OES Engines from S.Mateo county are
going south. They are expecting to contain the Canyon fire tonight , but then
again I doubt they ever thought it would get this big , things change quickly

At Hollister Airport Sunday, and heard Tanker 81 talking to Hollister AAB as he returned from Grass Valley about 1815 hrs saying there were 15 or 17 fires, can't remember which, along the 49 area. An hour later when I was in the Morgan Hill ECC, the local dozers were cancelled from that call. Guess they jumped on them really fast.

Went by there today had some business in Calistoga. I had to drive HWY 29 from HWY 20.

The fire was still smoking way up in the hills. Saw a pretty good air show with a Heli-tanker and a CH-47 with a water bucket doing drops. The fire was no where near Tubbs lane like all the reports said.I had to go there today and there was nothing going on not even any fresh burns. It was on HWY 29 but South East of Middletown. Lot of equipment Dozer Tenders lined the side of the highway at least 8. Saw a few strike teams heading North. Unit's 23XX, 24XX, 26XX

They were working 151.310 as a air tac

Thanks for jumping on this Craig , sounded as if if it crested the ridge
they would have major problems

Cancelled the Air Tankers BUT not before Tanker 80 had a malfunction
with their doors and dumped the GEL on highway 24 :-)

wonder what that stuff does if it lands on your car ? LOL

the 3 Helos still working

Ed 1652 hours

-------------- Original message --------------
From: Craig Rose <craig@...>

Sounds like East Bay Parks, Contra Costa County and CDF were able to
hold this one. Reducing all incoming units except two engines to CODE
2.

Final report unless conditions warrant.

398. SIGNIFICANT EVENT - SJFD - HEAT RELATED

Yahoo group: BayAreaFire
Date: 2006-07-22 23:12:35 UTC
From: Craig Rose
Topic: 398 Message: 398

San Jose Fire and Santa Clara County AMR are working to cope with what has evolved into a major incident at the Arena Green adjacent to the HP Pavilion.

Currently the two agencies are contending with multiple patients suffering from heat related ailments. Current temperature in the area is over 100 degrees and most patients are attending an outdoor music event.

Partial list of resources on scene:

BATTALION 1 (IC)
MED 30 (MEDICAL GROUP LEADER)
HIT 29A
TRUCK 1
LIGHT UNIT 1
ENGINE 1
TRUCK 29
RESCUE MEDIC 29

AMR ALS RIGS x 7

MONITOR - SJFD COMMAND 3 - 154.115

Good Morning All,

Quick note to let you know that I have posted a set of shots from a two-alarm structure fire up on Silence Drive in the hills of East San Jose. You can see them here:

http://tinyurl.com/qrt3w

While shooting this fire, at 1:30 AM, it was still almost 90 degrees in the neighborhood! Tough conditions!

FYI - PG&E confirms that they have had over 1,100 transformers that require replacement and they are still in the process. Unheard of for this area. As for SJFD's call volume on Sunday - I believe it set a record, but I can't confirm that yet. Still checking.

Anyone else notice the unusual lineup of units rolling on a few

recent CDF calls ?

Besides the regular 16xx units , on a recent fire in an MTZ fire

in San Jose , the lineup included a Gilroy Engine, County Patrol 5

and Palo Alto Engine 9 , ALCO Engine 3463 .
They were rolling from CDF stations. I am

wondering if this is a new set-up when CDF resources grow thin

From: jawsj@webtv.net
Topic: 422 Message: 427

Hi, just got back from a driving trip to east Washington starting last Thursday. Noted the large fire to the west in T-S NF.

Saw activity yesterday as I returned. A muni Type 3 engine strike team from Nevada County going S on I-5, probably returning home; D/T 4544 in a rest stop waiting for his tender, he said he had previously been to both Del Puerto fires in July; a BNL crew strike team in a rest stop. Also, Tanker 94 was sitting at Weed Airport both Thursday and Sunday. That seemed odd to me; no a/c tanker support visible.

According to my buddies who have answered SJ area calls, a CDF BC said the local units (type 3s only) are covering the CDF higher priority stations while a CDF strike team is up North. There is a matrix showing which stations are to be covered in order according to engines available. For instance, Almaden Station (22) is the first to be uncovered. John

FYI, the unusual incident command terminology is something new starting this year for lightning-caused fires. First digit is the battalion it occurs in; second and additional digits are numerical sequenced count of those fires within that battalion.

429. Aircraft Emergency - Palo Alto @ 1:00 PM

Yahoo group: BayAreaFire
Date: 2006-08-02 20:00:46 UTC
From: Craig Rose
Topic: 429 Message: 429

Sounds like Palo Alto Fire is working an aircraft emergency out at the Palo Alto Airport. Not completely sure of the circumstances as this may be the same Cessna that prompted an ALERT 2 at the San Jose Airport about 20 minutes ago. If that's the case we are looking at a gear problem - possibly gear not deploying - they are discussing foaming the runway.

Aircraft is attempting to land with approximately 30 gallons of fuel remaining.

MONITOR:

PALO ALTO FIRE - 153.770
PALO ALTO TOWER - 118.600
MOFFETT TOWER - 119.550

This was a nail biter as this fire wound up drawing a full structure response from San Jose for structure protection.

I was about a mile from this fire on top of the hill above Almaden Lake Park. Got a great view of 80 & 81 doing drops and from my vantage point was able to hear ALL fire ground traffic! Quick response might I add! 82 & 83 from what I picked up on Air Tactics 5, did excellent drops, and AA-460 thanked them for the trip across the state!

Some of the Units:
AA-460 Tanker 80, 81(Hollister Tankers), 82, 83 (Columbia Tankers)
Copters 106 & 406
ST 9170C (CZU) and ST9460C (BEU)
Local Strike Team, I know Patrol 5 went on this from County Fire.
All SCU Engines except for i think it was 1684 1666 1675
Dozer 1540 (Woodacre) 1640 1641 Not sure why Belmont, Hollister and Felton Dozers were not avail
Ben Lomand 4 & 5 and 2 other BNL crews
Gabilan 2 & 3, and I belive one more GAB crew
All San Jose Patrols except 19 i think
All Battalion 13 Engines except for my boys on Engine 17, they know to stay avail to protect my house, LOL

County fire working a 2nd alarm at 975 Regent in Los Altos.

Fully involved dwelling , unknown if 1 or 2 stories. wires down

Sounds like 3 or 4 Los Altos PD officers evacuated several

homes along with their dispatcher calling some. One LAPD unit

while enroute several blocks away said flames showing. Must

have been really going good on arrival.

1st alarm
Engine 16
Engine 7
Truck 14
Hazmat 2
Battalion 7

2nd alarm
Engine 15
Engine 1
Truck 1
Rescue 3
Battalion 3
Safety Officer

Command 8 /154.40
LAPD / 483.0625

Craig -

Awesome review of this one. Without your details I would be totally lost. I was sick in bed with the flu when this broke. My pager went off over and over and it was KILLING me that I couldn't haul my bones out of bed and get down there for this one. I did catch the Air Attack and the air show - good stuff and made all the difference on this one. I suspect this is the first significant veg fire of the season for San Jose with many more to come.

Thanks for the posting!

How many companies will San Jose now have with these two stations ?

Right now they have 30 Engines , 8 Trucks , 3 USARs , 1 Air (breathing support) unit . 2 Hazmat units (HIT 29A and B) 5 Battalion Chiefs.
Engine Companies 2 , 12, 19 , 21 , 24 , 27 and 28 have brush patrols running with them.
Engines 2, 13 and 18 have watertenders with them

note I say 30 Engines , because there is no Engine 20.......instead its
Engine 20A 20B 20C 20D , they are ARFF units at Mineta-SJ Airport
(with Rescue 20) They also have a Foam units(not sure where its at ? maybe
5).
They new stations will have as follows
32) Cisco - TBA One Engine
33) Comm hill - One Engine
34) Berryessa - One Engine and One Truck BOTH new
35) Cottle - One New Engine and one present truck (18 becomes 35)
36) Yerba Buena - Old Engine 24 and a New Truck

37) Willow Glenn - One Engine

Med 30 is the Paramedic supervisor. Med Units 22 and 31 run with
Engines 22 and 31.

Rescue/Medic units 4, 18 and 29 run with Truck companies in their
respective stations.

These Five units (4,18,22,29,31) are all STAR ((Supplimental Ambulance Resource Units))
and are only used for transport if AMR is
real delayed.

Anyone have anything to add to this list ??

How many companies will San Jose now have with these two stations ?

Right now they have 30 Engines , 8 Trucks , 3 USARs , 1 Air (breathing support) unit . 2 Hazmat units (HIT 29A and B) 5 Battalion Chiefs.
Engine Companies 2 , 12, 19 , 21 , 24 , 27 and 28 have brush patrols running with them.
Engines 2, 13 and 18 have watertenders with them

note I say 30 Engines , because there is no Engine 20.......instead its
Engine 20A 20B 20C 20D , they are ARFF units at Mineta-SJ Airport
(with Rescue 20) They also have a Foam units(not sure where its at ? maybe
5).
They new stations will have as follows
32) Cisco - TBA One Engine
33) Comm hill - One Engine
34) Berryessa - One Engine and One Truck BOTH new
35) Cottle - One New Engine and one present truck (18 becomes 35)
36) Yerba Buena - Old Engine 24 and a New Truck

37) Willow Glenn - One Engine

I would guess it will move with them John , I can't see it going to
31 since they have to staff Med 31.

For Milt , Yes I left out the unstaffed Brush Patrols , when needed

they staff them with the guys from the Truck or USAR stationed with them

i.e. Truck 1 staffs Reserve Brush Patrol 1A and 1B , Truck 3 does the same

with 3A and 3B and USAR 5 staffs BPs 5A and 5B.

I am wondering if they will a couple reserve BPs to 34 since its further

east then either 1,3 or 5.....only time will tell.....

474. San Jose Fire improvements (i forgot some)

Yahoo group: BayAreaFire
Date: 2006-08-22 16:42:41 UTC
From: wireman1771
Topic: 474 Message: 474

Station 5 (10th/Old Bayshore) - Provide essential facility and/or functional upgrades. Existing two-company fire station. Scope of Work is for rear yard improvements and conduit for future installation of generator.

Fire Training Center - Work includes repairs and upgrading of the site paving, repairs to the existing HVAC systems and roofing

475. San Jose Fire Improvements (Entire list, kinda long)

Yahoo group: BayAreaFire
Date: 2006-08-22 16:40:47 UTC
From: wireman1771
Topic: 475 Message: 475

In the planning stage:

Station 19 (Piedmont Rd.) - Staff are in the process of analyzing possible relocation sites for Fire Station 19. The preliminary plan calls for a 6,300 SF, one company station. A site has been identified, and staff is currently in negotiation with the owner for possible purchase.

Station 21 (Cunningham/White) - A proposed new Fire Station in the vicinity of Cunninham & White Rd.

In construction:

Stations 4 (Leigh/City College), 13 (Pearl Ave.), 26 (Tully/Fairgrounds)- Installation of emergency generators for multiple fire station upgrade projects. These three stations are part of the initial group to receive generators.

Station 18 (Monterey Hwy/Skyway) - Construct a 350 square foot workout room next to an existing tool shed in the patio area of the firehouse.

Out to Bid:

Station 10 - (Monroe/Santana Row) - Scope of work has been refined to include site paving and drainage inprovements as well as an upgraded telephone system.

In the design phase:

Station 2 (Alum Rock) - Demolish and rebuild Fire Station 2 on the existing site. Construction targeted for 3/5/2007. Opening targeted for May 2008.

Station 12 (Calero/Cahalan)- Is going to be relocated to a new site at the corner of Calero and Cahalan. This Fire Station is a 6,300 sf facility for a single company. Construction targeted for 10/15/2006. Opening targeted for November 2007.

Station 17 - (Blossom Hill/Conniston)The Fire Station is going to be relocated to a new site at the northeast corner on Blossom Hill Road and Coniston Way. This fire station is a 6,300 sf facility for a single company. Construction targeted for 9/15/2006. Opening targeted for October 2007.

Station 22 (Camden/Bose) - Provide the Fire Department's workout room which is a 350 SF free standing building to house their workout equipment. Construction begins August 2006, complete by Dec. 2006.

Station 25 (Alviso) - The Fire Station is going to be relocated to a new site at the northeast corner of Grand Blvd. and Wilson Way. This fire station is planned as an approx. 6,300 sf facility for a single company. Behind schedule. Completetion by August 2007.

Station 34 NEW!! (Las Plumas/Nipper) - We have scheduled a Community Outreach Meeting for April 6th at 6:30 pm. The location will be at the City of San Jose's Mabury Road Yard at 1404 Mabury Road. This project is currently in the construction document phase. The city's design consultant is RRM Design Group of San Jose. The scope of work for this project is to construct a new two company fire station. This facility will be approx. 11,700 sf, two story, three apparatus bay station. Adjustments to the design are being made to address recent larger than anticipated increases in regional construction costs. Construction is scheduled to commence in August 2006 with completion in June 2007.

Station 35 NEW!! (Cottle/Poughkeepsie near IBM) - This project is currently in the Construction Document phase of design. The city's design consutant is RRM Design Group of San Jose. The scope of work for this project is to construct a new two company and Battallion Chief firestation. This facility will be approx. 12,700 sf, two story, three apparatus bay station. The location of this firestation is adjacent to the existing Southside Community Center. Adjustments to the design are being made to address recent larger than anticipated increases in regional construction costs. Construction is scheduled to begin August of 2006 with completion in Sept. 2007.

Station 36 NEW!! (Silver Creek/Yerba Buena area) - October 2005: The City is still in the process of selecting the appropriate site for placement of the new fire station. In June 2004, Council adopted several changes to the Public Safety Bond capital program. The scope of this project has been changed to relocation of the existing FS 24 to a new station on a different site. Project is in the site investigation phase. Construction is scheduled to begin July of 2007 with completion in July 2008. February, 2006: A public vote is to be held to determine if a portion of Silver Creek Linear Park will be used to accomodate a 2 company, approximately 11,500 SF station. The area under consideration is at the corner of Yerba Buena and Silver Creek Roads. Completion targeted for July 2008.

Station 37 NEW!!!(Willow Glen) - Project is in the site selection and investigation phase. Construction is scheduled to begin April of 2009 with completion in May 2010.

Alameda City Fireboat on scene , seems the Pier is unstable , not wanting to put land units on it. The Phoenix has turrents that can shoot low underneath the Pier which is what they need. the Pier is at the end of
Entrance road , a bit S/E of Jack London Square.

496. Hazmat Drill in San Ramon today

Yahoo group: BayAreaFire
Date: 2006-09-03 18:23:21 UTC
From: Craig Tomasello
Topic: 496 Message: 496

About 10 am this morning, Santa Clara County sent a Mutual Aid Strike Team to San Ramon for a hazmat drill at Northbound 680 at Crow Canyon Road, (dispatcher called it Croy Canyon Rd, but that wasn't right).

I forgot who's going from Palo Alto and from Santa Clara and the engine for County, but I know:

San Jose Engine 16
County Battalion 7
Sunnyvale Engine 3

So if you hear a local government mutual aid strike team, that's what's going on. Something like Strike Team 2306A...

For those of us crazy enough to try a more complex scanner, there is now a Yahoo! group just for the Uniden BCD 996T.

The group is just getting started. If you have spent any time at all with this scanner, you know how complex and feature rich it is and how hair-pulling it can be to figure out.

If you already own or are considering a Uniden 996T add this Group to your list of Yahoo! groups. Between all of us, maybe we will find someone who has all the answers.

Personally, my 396 & 796 works fine. I don't know why I had to add the 996 to my life - but I did, and I along with others, can always use help in making it work.

Please add this group to your list if you are a 996 user:

http://groups.yahoo.com/group/BCD996TGroup

500. CDF SCU Junction Fire Info Part 2

Yahoo group: BayAreaFire
Date: 2006-09-04 05:06:36 UTC
From: Craig Tomasello
Topic: 500 Message: 500

16:07 hours...

MMU sent Engine 4287

Tanker 85 and 86 from Sonoma enroute
Copter 406 (BEU Bear Valley) enroute

IC advising they should be able to get this fire with what they have on scene

Copter 406 entering unit....

This is where the recordings end, but hey got some great info!!

Stay in the know. Pulse on the new Yahoo.com. Check it out.

501. Why You won't hear SCU traffic sometimes

Yahoo group: BayAreaFire
Date: 2006-09-04 05:04:33 UTC
From: Craig Tomasello
Topic: 501 Message: 501

Someone asked why they couldn't hear SCU traffic on the Junction fire....

Most of the traffic on this fire was on TONE 3, and WHITE 2... Tone 3 is the CENTRAL VALLEY repeater for SCU. Most people in the bay area with hand held setups WILL NOT hear SCU Tone 3 unless they're above the valley floors. Obviously White 2 is not a repeated channel so you wont hear that channel.

From: jawsj@webtv.net
Topic: 496 Message: 504

FYI, this is a "rolling" strike team drill done the first Sunday of each month within Santa Clara County fire depts. The rigs actually go meet up at the rendezvous point, with the ST leader, then return home. There is a pre planned list for which SC fire agency is the ST leader, by which area of the county will be closest to the pretend incident. jw

512. [BayAreaFire] Valley Smoke

Yahoo group: BayAreaFire
Date: 2006-09-15 06:02:58 UTC
From: Mobile11@aol.com
Topic: 512 Message: 512

I was out in Tracy these evening and the there was smoke everywhere. There was no fire going on that I know of locally. The smoke was just everywhere North of Tracy. Would that be the smoke from the "Forest Hill" Fire???

Paul

513. Re: [BayAreaFire] Valley Smoke

Yahoo group: BayAreaFire
Date: 2006-09-15 15:48:10 UTC
From: John Whitaker
Topic: 512 Message: 513

You bet!

We drove to Tahoe on Wed. Smoke all the way up from Auburn to the Lake. Could not see across the Lake because of smoke on Wed. evening. Thursday, stormfront came through and blew the smoke out of Tahoe basin, but it went out towards the coast. Lake area and Sierras were clear until we got down to Lockeford area. Could then see smoke blowing on a diagonal from the Sierra foothills out to Tracy. Once over into Livermore area, smoke was pretty much gone. Must be a smokey fire!

From: Craig Rose
Topic: 515 Message: 515

Hey folks -

Been super busy of late, but thought I'd pass on a shot of the new Rescue 2 here in Santa Clara.

http://tinyurl.com/ep4mm

I like it, but I really grew to like the old "lime green machine" that is being put out to pasture. Here's a link to the old International:

http://tinyurl.com/g5l94

Also, I don't think the press, other than Bay City News, did anything with this incident. Last evening I passed along a couple of details on a major auto-ped that occurred at Kiely Blvd. and Homestead. This was as nasty as they get - three pedestrians killed - one a baby. Santa Clara Engine 3 (A-shift) is located at this intersection and the response time was instant. A very tough night for the crew.

531. South County Fire changes

Yahoo group: BayAreaFire
Date: 2006-10-18 20:41:51 UTC
From: Ed
Topic: 531 Message: 531

Belmont and San Carlos are going thru some changes , if anyone has the FULL story , please post it. It appears there is no longer a South County Fire Authority but now a Belmont-San Carlos Fire Department. There is a bond issue for the voters of the two cities so that San Carlos will pay 53% of the budget and Belmont 47% . They have flipped flopped an Engine and Truck. The Truck now is numbered 14 and of course now runs out of Station 14 on Ralston just east of Old County road (by the Wendys') and Station 13 in San Carlos on Laurel near Holly, once again , has an Engine (13) along with Hazmat 13 and Battalion 4. Again , if anyone has more information , please post it. Thanks

Ed

PS , thanks for the pics to Craig

From: My e-mail
Topic: 531 Message: 532

IN 1978, when Belmont & San Carlos merged, Belmont had the truck. A 1972? Seagrave Rear Mount. San Carlos did not have a truck. The truck ended up at Station 17, Brittain and Industrial as a truck house until they closed that station. T17 moved to Station 13. You have trucks at Redwood Station 9, Foster City Station 28, and San Mateo Station 21. High Rises at Redwood shores (Belmont responce area) and in Belmont.

This sounds like a biggie guys

5150 Felter road in the east foothills in N/E San Jose up
Mt.Hamilton.....Spring Valleys' area

50 acres and 5 structures with another 15 structures in immediate

danger , fire has potential of 400 acres. San Jose has at least

at Tier 2 , Milpitas , Spring Valley Volunteers and CDF enroute or

on Scene. CDF asking for 4 Helos and 6 Air tankers

CDF 151.445 /
White 3/ 154.295
San Jose .....I think they are on Command 4/ 153.98

not sure which Air tac as they also have a couple fires in Santa
Cruz county at this time

Ed/ 1520 hours

Topic: 543 Message: 543

The fire in the foothills of San Jose (Felter road).....

Sounds Like San Jose called either a Tier 3 or Tier 4 plus a

strike team of 3 county Engines and 2 Santa Clara City Engines

5 structures were greenhouses or other type outbuildings NOT
homes

last I heard about 20 minutes ago fire was at 200 acres with

the left flank contained. now on CDF Command 2/ 151.265 and

San Jose IS using Command 4 / 153.98. Tac channels are

CDF Tac 2 / 151.16 and CDF Air Tactics 5/ 151.295

New fire breaking in the Loma Prieta area , Copter 106 saying

1/2 acre but structures threatened asking for 10 more CDF type

3 Engines and a strike team of type 1 Engines for structure pro-

- tection. on 151.37 unsure of tac channel

544. 3 Firefighters killed 2 injured in SoCal wildfires

Yahoo group: BayAreaFire
Date: 2006-10-26 18:59:11 UTC
From: Mobile11@aol.com
Topic: 544 Message: 544

By JACOB ADELMAN, Associated Press Writer 23 minutes ago

CABAZON, Calif. - Three firefighters were killed and two critically injured as they battled a wind-whipped wildfire Thursday that drove hundreds of people from their homes near Palm Spring, the U.S. Forest Service said.

The firefighters were trying to protect a house early Thursday when the flames swept in.

"The engine was in the area and with the wind conditions like they were, the fire just overtakes and burns the entire engine," said Pat Boss, a U.S. Forest Service spokesman.

All U.S. Forest Service personnel were pulled off the fire after the deaths so they could "gather their thoughts, say their prayers," he said.

The fire, pushed by dry Santa Ana Winds of 25 mph or more, quickly blackened more than 4,000 acres and destroyed at least three homes on Thursday. At least one civilian was also injured.

The cause of the fire wasn't immediately clear. It started early Thursday, burning in a valley with a few scattered ranch homes. The hamlets of Poppet Ranch and Twin Pines were evacuated along with a juvenile center, Twin Pines Boys Ranch.

About 200 people left homes when mandatory evacuations were ordered, fire Capt. Julie Hutchinson said.

Topic: 545 Message: 545

Most recent Information on the large fire in the Palm Springs area

4 Firefighters have died , a 5th is very critical with burns over

90% of his or her body. Their Engine was overrun and destroyed by

the fire as well as the surrounding homes. They were on the rig

at the time. They were with San Bernadino NF Fire.

Fire as of 1400 hour was 10,000 acres , 0% containment and could

reach as much as 25,000 acres with lots of evacuations. One

RV park surrounded by fire with 400 residents told to shelter in

place , fire fighters were with them and they " believed" they
would

be Ok.

Incident is arson/murder and a $100,000.00 reward for infor

-mation has been posted. More later after I watch the

evening news.

From: Ed
Topic: 549 Message: 549

Around midnight last night , Alameda County formed a strike team

to go to the fire down south , included BC3411 , Fremont + others

KGO just now reports and showed some footage that in addtion

Marin sent a local gov (cities) Strike team as did Contra Costa

and Santa Clara.

CDF/SCU sent another at 1000 hours this morning including

Engines 1671 and 1673.

I am hearing some " chit-chat" on CDF/ CZU and wondering

if they maybe are about to go also. San Mateo County has sent

at least one overhead personnel to the fire

Hey folks -

Another set of photos, this time from the wildland fire incident (FELTER FIRE) above San Jose and Milpitas, has been posted to emergencyphoto.com. You can see them here:

http://tinyurl.com/yyf4vc

Also, for those interested in San Jose Fire's history, I have posted photos from the William Anger Station 8 Dedication held some weeks ago. If you are not familiar with Bill's tragic story, please feel free to check it out at the IAFF Local 230 website:

http://tinyurl.com/y64n6o

Images can be seen here:

http://tinyurl.com/u3uxy

Finally, if you are in a place to do it, I would like to invite each of you to consider making a contribution to the Wildland Firefighter Foundation. In light of the loss of four USFS firefighters and the highly critical injuries suffered by a fifth member of the Engine 57 crew, this is a perfect time to convey thanks for the ultimate sacrifice that these men made in the line of duty.

http://www.wffoundation.org/

Hope everyone is having a wonderful weekend.

Cheers!

Craig

Sorry for the delayed response . As you probably guessed

Milt , it was Engine 3 . KRON later said lot of damage to both

E3 and the SUV . 3 of the SFFD guys were treated and released

and they held onto the 4th member at least overnight.
I believe one of the SUV

occupants had a broken leg or arm. Engine 3 WAS rolling

Code 3 on a run

Hey Ed - the Snorkel comes out to fill-in when maintenance is being conducted. The most recent use for this "reserve" apparatus has been in place of the "real" Truck 3 and Truck 4. And I believe you are right - the Snorkel was Truck 1 in its prime. Still a pretty cool apparatus and really came in handy on the Palm Street fire as the sticks would have had a horrible time with the overhead electrical wires.

I have info that says SJFD Apparatus committee will visit Crimson Fire Apparatus this coming week to participate in a pre-construction conference for the building of the 2 tractor-drawn aerials.
Have seen comments about this topic so thought I would add new info.

Also 3 new Ferrara/Spartan engines are due very soon for stations 13 (my second due), 16 and 33 (yes, the new one on the hill due for completion summer of 2007). For once, sta 26 isn't getting a new one. They are still "stuck" with the KME. jw

I have info that says SJFD Apparatus committee will visit Crimson Fire Apparatus this coming week to participate in a pre-construction conference for the building of the 2 tractor-drawn aerials.
Have seen comments about this topic so thought I would add new info.

Also 3 new Ferrara/Spartan engines are due very soon for stations 13 (my second due), 16 and 33 (yes, the new one on the hill due for completion summer of 2007). For once, sta 26 isn't getting a new one. They are still "stuck" with the KME. jw

Dec 3, 2006 - BCN34:UPDATE: SJ FIRE REACHED FIVE ALARMS, INJURED FIREFIGHTERS

BCN34 -SJ FIRE (UPDATE ON BCN17)

SAN JOSE (BCN)
Five firefighters and a police officer were injured this morning while battling an explosive fire at a one-story wood frame house south of downtown San Jose that reached five-alarms as a gas leak fueled the flames, according to a fire captain.
The neighborhood near the house up in flames on Edwards Avenue between Vine Street and South Almaden Avenue was evacuated as a hazardous materials crew, police officers, and several fire agencies battled the fire first reported as two-alarms at 1:16 a.m.
"One hour into it, a large explosion happened," fire Capt. Anthony Pianto said. That's when firefighters called for help as flames fed by natural gas continued to spread, gutting the single family home and leaving its residents with no place to live.
Pianto said because of flare-ups, crews as of 6 a.m. were watering the home from a distance, taking caution to shield themselves with the possibility of another explosion. "Once we confirm there is no longer a gas leak, it will be under control,'' he said.
The six reported injuries are not considered to be life threatening. Four firefighters were treated and released. A firefighter and a
police officer remained hospitalized this morning.
The blaze was contained to the one residence, which, according to Pianto, "sustained major damage.''
"It was a pretty challenging fire,'' he said.

I think BCN got this one wrong. KCBS and KRON (video) both quote our
PIO and report it as four-alarms. Only BCN has this as five-alarms.
Either way, it was one heck of an explosion!

Craig - Bryan is right , I was pretty sleepy when

they called it , but Sunnyvale Truck 2 , an Engine from

Mountain View and I didn't catch the other Engine(s) or the

BC, but I thought I heard them mention a County unit The Milpitas
Truck must have come on the 4th alarm

The 5th was called for rehab and code 2 only

OES Engines 262 and 288 out of San Mateo county have been

dispatched to the incident. One must assume other local

OES Engines have gone. Word is the fire is now near 10,000

acres. CDFs website shows 9,700+ @ Zero % containment yet

says they expect containment tomorrow.....I don't know

how they figure that , maybe the winds will shift to

coming from the Ocean......we'll see.

thanks for posting the pics of the Edward st. fire John

looking forward to Craigs' as well. Quite an incident.

Hi...

Here are photos of yet another multiple-alarm, late-night fire that FASCV responded to. This one at 1:49AM this morning on Richland Ave. @ Koch Lane in SJ. Single-family, one-story home with large basement room. Fire was confined to basement with severe access and smoke evac challenges. Not often that you see a 3-alarm house fire with so little visible damage from the outside. Support 2 returned to quarters at about 6:20AM.

Enjoy,
John

Hi...

Photos from this morning’s 3rd-alarm apartment house fire in San Jose at 627 Nordale Ave. near Senter Rd. 7 members of FASCV responded with Support Unit 2. A busy 5 days for the group with 7 responses. My personal 5th fire in 5 days. At least this one was not in the middle of the night like 3 of the others!

Enjoy,
John

631. Edwards Ave. Fire & Explosion Images

Yahoo group: BayAreaFire
Date: 2006-12-18 05:59:27 UTC
From: Craig Rose
Topic: 631 Message: 631

Hey folks,

Happy holidays! Sorry this took so darn long to get out on the web, but I finally posted a set of shots from the Dec. 3 Edwards Ave. fire and gas explosion. You can see the shots here:

http://tinyurl.com/y3hnxo

There are also a few images from recent incidents posted here:

http://tinyurl.com/lsnlk

A few of the shots on this page are from a fire that occurred to the rear of one of the last remaining unreinforced brick structures in the city of San Jose. Other shots are from a 2-alarm fire at a North First St. restaurant. The rest of the images are from the past few months and many of these will be moved off of the page and replaced this week.

Enjoy!

I wish Santa Clara County would get its act together on mutual aid.....read on

1st) Mountain View T1 did roll but only about 10 minutes after the 2nd was called , I have heard

delays with MVFD before . Sunnyvale also seems to take awhile to get their M/A rolling.

Craig --- you heard NASAs Truck too ?? geez , I heard County T14 also that means
they had THREE Trucks coming on the 2nd alarm which by the way got cancelled.

San Mateo County is SOOOOOO much better at rolling units than Santa Clara county
with the exception of San Jose. I mean 1st alarms seem ok but when these smaller depts
call for M/A there seems to always be delays and confusion . I hope they are working to
standardize and set up pre-assignments for the whole county.

IMHO anyway
Ed

641. San Jose Fire - Fatal Blaze

Yahoo group: BayAreaFire
Date: 2006-12-23 18:32:23 UTC
From: Craig Rose
Topic: 641 Message: 641

Tough night all around with a fatal fire at 597 Edelweiss Drive between Indigo and Narvaez at 1:28 am. This incident went to two-alarms after Engine 13 began their initial attack and found several small propane bottles venting significant flame to the rear of the two-story residential structure. Fire swept through the kitchen, part of the living room, and at least one of the upstairs rooms. Knock down was achieved relatively quickly.

Partial List of Units Working:

BATTALION 13 (IC)
BATTALION 1
BATTALION 2
4A2 (DC)
4A8 (DSO)
4A16 (PIO)

ENGINE 13

Tonight, San Jose Channel 11 Reported:

"SAN FRANCISCO -- A father of three has died after being overcome by smoke in a Christmas morning apartment fire in San Francisco. The fire broke out in an apartment building in the city's Mission District. The wife and three children of Augustine Garcia, 33, escaped the fire with six others in the building. Witnesses said Garcia died when he stayed behind to try to extinguish the flames. The four families displaced by the blaze stayed in a nearby Hotel on Monday. The Red Cross is seeking more permanent housing for the families."

John , see my earlier post on this fire :-)

btw , they had a rekindle early this morning , sent the following

County E4
Casa Loma Volunteers
Uvas Volunteers

Santa Cruz E3622 3641 Watertender 3651
(partial list)

Once again they advised building was fully involved and this time
completely destroyed.

An excellent save! I arrived at the 16-minute mark and crews (especially E10) had knocked this one down and limited spread. I'm not sure how many units were damaged, but the charring on the exterior on the B and A sides of the fire building was remarkable. Heavy fire conditions were definitely present early on. T4 crew did the roof work and cut at least two holes limiting fire spread in the attic space. Here are a few of shots from the incident - not a lot of flames or smoke by the time I got there so I limited my work to people.

http://tinyurl.com/yhz9dq

http://tinyurl.com/yfpulo

http://tinyurl.com/ydzwf5

http://tinyurl.com/ycmqj4

So there it is...the last fire of 2006 for the SJFD. It's been a very busy few weeks. Here's hoping we all have a safe 2007!

Add San Jose Engine 18 and Water Tender 18 to this incident.

Latest report is that a good water supply has been established and
crews are getting knockdown on the fire with an estimated four hour
commitment via CDF Battalion Chief now acting as the incident commander.

Ok, Thanks Craig - its RivermarK not Rivermart

tons of new condos / apts in area. this had real potential

one exposure was a 7 story under construction condo or apt

complex - they caught it in time NICE JOB .

I can't believe how calm the IC Chief was REAL PROFESSIONAL

NBC11, the station formerly known as KNTV (!) reported at 5 o'clock
that some of the Santa Clara firefighters at the scene were involved
in the Santana Row fire (some time back) and they were able to put
into action some of the things they had learned from fighting that
big, nasty fire.

And Randy Titus started out at Santa Clara County Communications as
a dispatcher (way back in the good ol' days), which is where I knew
him. He was always calm and collected on the radio, so it's not a
surprise that he does so well as a Battalion Chief. I'm sorry that
I missed hearing it.

Thanks for that information Dave . Yeah, it wouldn't be that tough to

get this fire confused with a drill being he was so calm , almost to a point to you

ask how does he do that. I mean its hard not to get your blood pressure up and your

voice raised when your facing a fully involved 4 story building with immediate threat

to a 7 story building 15 feet away. If we had winds today like last week, this baby

could have turned into a real conflagration , worse than Santana Row , more like Oakland

GREAT Job SCFD / SJFD and others !

Ed

Craig that is the same BC I mentioned here at a large fire about 8 months ago , I remember

you telling me it was BC Titus then also . Guy is SOooo calm and collected , unlike some I have

heard in the past who are in a complete PANIC. Craig - Can you see if you can get the

times of the alarms ? KNTV said it went from 1 - 5 alarms in 5 minutes ..... I can't say

it didn't because the first I caught it on the scanner it was 4 then shortly after that I heard

the red net tone out the 5th. But 5 minutes is REAL fast.... just curious :-)

490.0625 is the proper frequency for Medic Ambulance Dispatch - The Ambulance provider for Solano County

Some helpful info for your listening pleasure:

1xx cars are 24 hour station cars - Fixed Home
101 = Vallejo
102 = Benicia
105 = Rio Vista
106 - Dixon

2xx cars are 12 hour daytime flex cars
3xx cars are 12 hour nightime flex cars
7xx cars are Sacramento units
8xx cars are non-emergency units

Posts you may hear:

Post 4 - 80/Red Top Rd (Fairfield/Vallejo)
Post 7 - Springs / Oakwood (Vallejo)
Post 8 - Travis / Holiday (Fairfield)
Post 9 - Wal Mart Parking Lot (Vallejo)

Too bad I can't get Vallejo FD , I can get Solano County Fire.

VFD called a 5th alarm last night for a restaurant/motel

fire at 44 Admiral Callahan lane @ Tennessee st. Fire started

in the Good Time Cafe and extended well into the Quality Motel.

Mutual aid included

American Canyon (including Truck 11s ladder pipe)
Fairfield
Benicia
Vacaville
Crockett

original damage estimate is over One Million (probably
higher , ya know they aren't that accurate :-)

Hi...

Thought you might like to see my photos from today’s SCCFD fire at 19915 Wright Ave. @ Old Santa Cruz Hwy. above Los Gatos. Fire fighting included a long hose relay up the hill involving the Loma Prieta Volunteers’ water tanker at the bottom of the hill pumping up to SCCFD E8, pumping up to SCCFD E3, that was pumping up to SCCFD E4 at the fire’s location at the top of the hill.

Enjoy,
John

John Whiteside was the focus of the TV piece. I was in a couple of the shots wearing our baseball-style cap and a very bright yellow turnout. We buy the donuts out of our own pockets (then get reimbursed from assoc. funds) from any donut shop en-route. As it happens, Hooz Donuts (open 24 hrs.) at Almaden and Curtner is usually on the way to, or from, SJFD Sta. 26 where we keep the Support Unit 2 (that was in this TV piece). As a rule, we buy 1 doz. donuts for every alarm of the fire. Hence, a 3-alarm fire = 3 doz. donuts. That has proven to be a good ratio. Our assoc. is funded from our own dues, supplemented by general donations, and firefighter donations to United Way.

I am surprized they didn't call for at least another Engine and/or
Truck. T1 had its tower in operation and I think E1 or 3 had either its
monitor or they were using 2-1/2" lines for awhile . Seems to me Milpitas
doesn't call for help from outside agencies very often ....anyone got an
comment on this ???

Heard the Sheriff on 453.725. I was in the area wondering what was happening. S/O all over the place but never mentioned what was happening. HENRY 1 was orbiting the area. I figured it was fire or something Law Enforcement.

Saw a couple other things today wondered if anyone heard or new what was up.

Around 2:30 a Working house fire in SF near Paul and 101. Building with Smoke and Flames from the roof. From the freeway I saw SFFD Rescue 2? and a BC chief coming S/B 101 from Army Street (Cezar Chavez)

Around 3:30-4:00 W/B 580 near the Richmond Bridge Toll plaza. 1-2 cars in the fast lane. One possibly rolled. Major injuries. RCF on scene with 2 AMR rigs and a Supervisor. Also heard CALSTAR 8 getting updates from the ground. CHP and CalTrans also there.

Busy day on the road

From: Ed
Topic: 699 Message: 699

I should have posted this a long time ago. For those of you who

have Video tapes or DVDs of fires , from anywhere and wish to trade

or sale them on this list ,, go right ahead. In the future I will

post information as I have several VHS tapes from FDNY , Chicago

Philadelphia and other cities. I also have a couple DVDs. I am not

selling them yet , but will offer to sale/trade at a later date.

Btw , I am really interested in SFFD tapes or DVDs.

Con Fire just had a 3rd alarm in the Rossmoor Adult Community

on Golden Rain Driver. Fire destroyed several apartments of a

2 story woodframe apartment building. Couple civilians injuried

During overhaul , Con Fire discovered a woman missing from the fire , the apts were fully involved and the 2nd floor and roof had collapsed so they had a hard time finding her.

She , of course , was DOA ... they also found she had been one of those who called 911 reporting the fire.

Another woman with burns over 25 percent of her body is hospitalized

703. San Jose Fire Stations Updates (Kinda Long)

Yahoo group: BayAreaFire
Date: 2007-01-28 04:37:12 UTC
From: wireman1771
Topic: 703 Message: 703

New Fire Station Projects

Fire Station No. 34 (Berryessa)

A site on Las Plumas Ave was acquired to construct a new Fire Station No. 34 and a north satellite fire training center. Construction started in August 2006 with completion expected in June 2007. Staff is working with adjacent property owner to obtain a permanent utility easement. A baseline budget reset from $6,137,000 to $6,489,638 is being recommended for this project. Council approved additional funding for this project while reducing funding for the Fire Station No. 35 project at the time of award of both projects on June 27, 2006.

Fire Station No. 35 (Cottle/Poughkeepsie)

A new Fire Station No. 35 will be located adjacent to the Southside Community Center. Construction started in August 2006 with completion expected in September 2007. A baseline budget reset from $6,645,000 to $6,285,000 is being recommended for this project. Council approved a reduction of the project budget in conjunction with additional funding for the Fire Station No. 34 project at the time of award of both projects on June 27, 2006.

Fire Station No. 36 (Silver Creek/Yerba Buena)

The City placed a ballot measure in the June 6, 2006 election to seek voter approval for the use of parkland for the fire station project. The ballot measure was approved by the voters of San José by a large margin. A consultant contract was awarded in November and design activities began in early December.

Fire Station No. 37 (Willow Glen)

Staff is searching for sites within an identified search area in the Willow Glen area. Fire Station Relocation Projects

Fire Station No. 12 (Calero)

Fire Station No. 12 will be relocated to a site on Cahalan Avenue and Calero Avenue. Final construction documents are underway. This project will be packaged with Fire Station No. 17 and bid in January 2007. Award is expected in March 2007.

Fire Station No. 17 (Cambrian)

Fire Station No. 17 will be relocated to a larger site on Blossom Hill Road and Coniston Way. Bids were received in August and were

significantly higher than estimated. After evaluating various options staff has determined that the best strategy would be to package this project with Fire Station 12 and re-bid in January 2007 with award expected in March 2007.

Fire Station No. 19 (Piedmont)

City staff has identified a potential site for the relocation of Fire Station No. 19 in the northeast San José area. Council approved a needs and necessities action on August 22, 2006 and the City gained possession of the property on November 1, 2006. This project was moved to a pending schedule status due to land negotiations; the schedule will be updated once a design consultant is on board. Due to a steep escalation in construction costs since the issuance of the bond, staff is looking at various options that will allow the City to deliver the program within the available budget. As part of this strategy, the consultant for Fire Station No. 36 will be evaluating and validating the scope for all future fire stations. Staff is awaiting the completion of this report before proceeding with the hiring of the consultant for this project.

Fire Station No. 21 (White Road)
Staff is assessing site options near the vicinity of White Road and Cunningham Avenue for the relocation of Fire Station No. 21. Discussions with property owners are underway.

Fire Station No. 25 (Alviso)

Fire Station No. 25 will be relocated to a new site on Grand Boulevard and Wilson Way. Site work was completed to raise the ground elevation of the station to protect it from potential flooding in the future. Construction of the main fire station started in August 2006 with completion expected by late Summer/early Fall 2007. Staff is recommending a budget reset from $5,117,000 to $5,192,100 for this project as the original scope was expanded to include additional underground utility improvements. Additional funding was approved by Council on June 6, 2006.

Fire Station Remodel Projects

Rear-yard (driveway) construction activities were completed at Fire Station No. 10 (S Monroe St)
and are in progress at Fire Station No. 5 (N 10th St) with completion expected in December.
Construction is being conducted through Job Order Contracting (JOC). Wet weather during the
spring delayed construction activities and the schedule for Fire Station No 5 is tracking as extended.

Fire Station No. 22 (Bose Lane) will be upgraded to include a new exercise room. This project will
follow the design of the exercise room in Fire Station No. 18

(Monterey Highway) which was
completed in August. Delays in completing Station 18 have resulted in
the extended schedule for
Station 22.

The scope of the Fire Station No. 2 (Alum Rock) Rebuild project
entails demolishing and rebuilding
a new two-company fire station at its current location. The design
consultant is currently working
on the design development phase of the project. Award is anticipated
in August 2007 and
completion expected in November 2008. A baseline schedule reset is
being recommended for this
project as the schedule of this fire station is linked to the
completion of Fire Station No. 34 for
operational purposes. When the baseline schedule for this project was
set, an earlier completion
date was anticipated for Fire Station No. 34. Changes to the original
schedule for station 34 have
necessitated a schedule change for this project.

Craig , thanks so much for posting this information. I am sure everyone likes having your updates on these projects.

a Couple questions ...Do you have information on Station 33 ? We know that the department already has a new Engine 33 (along with new Engines for 13 and 16) in the city.

Do you know where the city is planning on moving 19 to . I have a lady friend who lives in 19s first due area

thanks
Ed

In regards to Fire station #19 this is from the August 22, 2006 City Council Meeting...

Recommendation: Adoption of a resolution determining that the public interest and necessity require the acquisition of a portion of a parcel currently improved with a vacant commercial building, for purposes of relocating and constructing a new facility for Fire Station 19 at the corner of Piedmont and Sierra Roads, from the owner, Piedmont and Sierra Road Plaza, LLC, A California Limited Liability Company (☐Owner☐) and located at 1275 Piedmont Road, San José, CA 95132 (APN No. 59114052) and authorizing the City Attorney to file suit in eminent domain to acquire such property interest, to apply for an order for possession before judgment, and to prosecute the action to final judgment, and authorizing the deposit of money in court for possession of the property from the funds lawfully available. CEQA: Exempt, PP06116. Council District 4. (Public
Works)

In regards to Fire Station 33:

I can't for the love of me find ANY info on the status of Station 33. The operating costs, however have been adopted into the '06-'07 Fiscal Year Budget, so that's why we have Engine 33 already here. I've also located the General Contractor on the building of 33.

Gonsalves & Stronck (San Carlos, CA) has been awarded Construction of a new steel, two--story fire station for the Tuscany Hills residential development in San Jose. (A.K.A. Communications Hill). Not so sure if we're going to find much more public information on this since this is a privately funded construction project.

Ed asked:

> Couple questions ...Do you have information on Station 33 ?

If you will permit me, I can add what little I know about Station 33, and hope it is helpful.

It's at the corner of Saint Florian Way and Altino Boulevard, in the development at the top of Communications Hill Boulevard off Hillsdale Avenue.

(Note1: It cannot be reached from the road to County Comm.)
(Note2: It's Hillsdale Avenue, not Old Hillsdale Avenue.)

I located the building fairly easily, about a month ago, and at that time, it was a metal frame with very few walls and lots of wires hanging. It was definitely a two story building.

I'm not part of the digital camera revolution, so I did not take a picture, so perhaps someone else can do that.

I, for one, was not aware of that, but it sure sounds right.

I recall thinking that "Altino" is probably based on "alto," which is not so much a musical term, but means "tall" or "high" in Spanish, which is appropriate for the development up on the hill. (!)

Then, I recall thinking that there are so many new street names that it will take us "old-timers" a long time to learn where they are.

Back to Station 33: maybe we can persuade photographer Craig to run by and take a photo or two. <g>

Final thought: the site of the new Station 17 is still a muddy, fenced vacant lot. I go by there fairly often, so I will post when there is any significant activity.

Dave S.

717. SJFD Stations 33 and 34

Yahoo group: BayAreaFire
Date: 2007-01-31 05:58:22 UTC
From: Craig Tomasello
Topic: 717 Message: 717

Ok guys, I ran by both 33 and 34 today. They are both being built by the same Genereal Contractor.

34 is at the intersection of Las Plumas and Lenfest Rd. in North East San Jose, almost Berryessa area. It is a 3 bay station and so far the block walls that form the apparatus bay has been built. The rest of the station is framed and the plywood is up so the station has taken a definite shape. Very modern fire station look and is set on a H U G E piece of land, so there may be more uses for this in the future.

33 as Dave mentioned is up there on St. Florian. As with station 34, station 33 is framed in, and the apparatus bays are built. Couldn't see much as the light was limited because I got there after dark. But the progress is about the same as 34.

Didn't get to make it out to 35, maybe some pictures this weekend if I can get this damn digi cam to work.

I would suspect that 33, 34 and 35 will all be opened within months of each other!

I responded to this call along with John Whitaker. I got lost with FIre Spt Unit 2 but thanks to John's cell call, we got on the right road. If it weren't for a regular hydrant across the street, with 120K gallon tank, and it being 2200 hrs so a neighbor noticed it, that large home would probably be on the ground. Residents were out of state. My humble opinion!!

5 BCs just doesn't cut it for a city/dept the size of San Jose. Consider San Jose is well over 900K , SF is 750K .....SJ is around 123 Sq Miles , SF is 49 and San Francisco runs 2 Division Chiefs and 9 Battalions Chiefs 24/7

I would guess a good move is to relocate BC13 to 26 and add a BC35 , just my 2 cents

I believe we do have a Division Chief that is pager only, (Craig, Ed, maybe you can clarify)

San Jose Currently runs:

31 Stations...

29 Type 1 Engines
3 Air Crash Engines (Station 20)
1 Rescue Unit alone (Station 20)
3 Rescue Medics paired with Truck Companies (29, 18, 2)
2 Rescue Medics paired with Type 1 Engines (22,31)
5 Truck Companies paired with Light Units (1,3,4,9,14)
3 Stations have USAR Companies Paired with "tenders" which is similar to the light unit (5, 13, 16)
7 Stations have Brush patrols for wild land responses (2, 12, 19, 21, 24, 27, 28) (Type IV? Ed?Craig?)
3 Stations have Water Tenders (2, 13, 18?)
1 Station has the Hazmat Unit (29)
1 Station has a Breathing Support Unit (Station 6)
1 Station has Hose wagon (Station 6)
5 Stations have Battalion Chiefs. (Right now 1, 2, 10, 13, 29)(Will be 1, 2, 10, 35, 29)

3 Fire Stations should be open later this year Increasing the count by 3 Engine Companies, 2 Truck Companies.

From: Craig Tomasello
Topic: 719 Message: 723

Ed,

I was looking at the spread of Chiefs and I agree... Moving 13 to 35 would increase response time for a chief to any major incident in Almaden. True he/she can hop on 85, but given the traffic on Almaden Expressway, good LUCK!! Would like to see 17 redesigned to house a chief. It would cover the southwestern portion of the city, and keep Battalion 10 from having to travel quite a distance to get to Station 9's Area.

Your point also bring validity because when we get upto 4 alarms, we're having only 1 Chief to cover the city from Communications. This presents a very dangerous situation because of the lack of leadership at major incidents.

From: Ed
Topic: 77 Message: 725

Craig T.s list is almost perfect ......only exceptions are

the Rescue Medics are with 18 29 and 4 not 2 (2 DID for a time

have the RM that is now back with 29 , it was done when San Jose

truama center closed , since Regional opened theirs , they moved

it back from 29 to 2) the other 2 are , as you said , with 22 and 31.

The new stations will actually add ONE truck (34) . the truck

in station 35 will be the old truck 18. When 36 opens it will add

a new truck. But keep in mind , 13 will get a Tiller-truck as the

2nd piece of USAR 13.

You folks are familiar with County Fire's Breathing Support Unit 2, correct? (I don't know if I read it here or on another group.) I think it's like Air Unit 6. Can I have an "amen" or "you're wrong," please.

They didn't have that unit when I left County Comm in 2003. (By the way, that was 4 years ago yesterday.)

And is a tiller-truck what I think it is? I may have to go over and peek inside the windows to see that thing.

Slept thru that one ;-(

As far as the breathing support apparatus , FIRE APPARATUS JOURNAL reported
in a prior issue that County, Santa Clara City and Palo Alto were all receiving them , they would
be painted in their jurisdictions colors , were paid for by (I think) FEMA. But it didn't mention
they would be tiller rigs (ummm , interesting)

Now I am DYING for a pic of one of them PLEASE LOL

I think Palo Alto Station 8 is located inside Foothills Park on
Page Mill Road. It is usually only staffed in the summer time.

http://www.pafd.org/profile/index.html

http://www.city.palo-alto.ca.us/press/New%20Releases/20040630.htm

(note the date on that second one, it's old news)

Curiously, non-residents are NOT WELCOME in this Palo Alto city
park.

Well have to check the news on that one . Sycamore is off E.El Camino Real

down towards Santa Clara. It is the only mobilehome park I have seen with 2 story mobilehomes

Busy morning

Palo Alto with M/A from Menlo E4 , Mt.View HEAT 1 and E5 had a hazmat

at SLAC - Stanford Linear Accelorator . Spilled 5 gal of Hydrocloric Acid , Incident went

on for about 3 hours.

South Santa Clara had a fully involved Barn fire - about 1000 sq feet .
used South S.Clara Engines 1,2,3 County E13 CDF E1671 , 2 Watertenders and a couple Chiefs. forget the address , was in San Martin

Finally , just after 5 , Foster City called a 3rd alarm for a house or two off Comet ave. with mutual aid from San Mateo , Belmont-S.Carlos , Central County and County.

Hi...

My photos from SJFD's 4-alarm fire at the Santa Teresa Apts. One of the busiest rehab efforts we have experienced recently. Both Support Units #2 and #3 were employed.

Enjoy,
John

760. Fire Associates at Morgan Hill Fire

Yahoo group: BayAreaFire
Date: 2007-02-15 01:36:44 UTC
From: John Steven Whitaker
Topic: 760 Message: 760

FYI...

Fire Associates was paged out at 2:27 A.M. this morning to a 2-alarm house fire at 17635 Peak Ave., Morgan Hill. Approx. 2 blocks north of Morgan Hill City Hall and directly across the street from Walsh Elementary. The large home was unoccupied - being remodeled. Complete loss from what I could tell. Support Unit 2 was "back in the barn" by 7:00 A.M. Lots of structure fires today, for some reason.

Morning Ed,

Still the USAR Company. Interesting that you heard that too. This is not the first time as I have heard the term "Truck" applied to USAR 16 and USAR 5 in the past, but I always figured it was the dispatcher that may have let that slip in the heat of an incident. No truck just yet.

Morning Ed and the Group,

Busy morning...or should I say busy winter?

This was another strip mall that was gutted. From the Mercury News - "Businesses in the mall, near Quimby Road, included a video rental, a cafe, a hair salon, a dental office, a photography studio and a water supply store."

Images coming soon!

Oh, almost forgot, there was also a triple fatal single vehicle accident at South 10th Street and Tully. VERY NASTY!

769. [SJFD] Santana Row Scare 21:45ish

Yahoo group: BayAreaFire
Date: 2007-02-19 06:23:09 UTC
From: wireman1771
Topic: 769 Message: 769

In order of being on scene:

B10 E4 T14 LU14 E7

125 Demerits to me as i thought "I'm just running to Ben & Jerry's in Santana Row... What could happen?" I leave the scanner at home and walk on over, and alas, something did happen.

I see B10 tearing up Winchester, and E4 comin' in off of Stevend Creek, and I put 2 and 2 together and hustled on down to Olin Ave. (I knew E10 was out on a call as I had just observed them tearing up Tisch Wy before I left my apartment.)

Smoke off the roof above Club One in SR. Lots of it too. E4 sets up right infront of the hydrant, B10 sets up IC infront of the entrance to the parking garage. T & LU 14 pull in from Winchester on Olin Ave, and set up shop. E7 comes in, but is quickly shooed away. LOL! This smoke was starting to look more like steam... And I guess that's what it wound up being. Brought back memories though!

Find Pics from my camera phone in the photo section of this group on this incident. I was takin' them because I knew Rose never gets there for the early action! :-)

I happened to drive by the new station being built on Poughkeepsie Road near Cottle Road, adjacent to the Southside Community Center.

It looks like they're moving right along. I could see a three-bay garage entry faced with stone, and a two-story building surrounding it. So far, it's just plywood, but with the good weather, I expect that they'll make a lot more progress.

Sorry, I don't have any photos, as I have not yet joined the digital revolution.

Hi Ed,

This was dispatched as a full-first, but was handled rather quickly allowing for Battalion 10 to release all full-first units almost as soon as they staged on Stevens Creek. As for my response - I was paged, but as soon as I turned on my radio I figured this one would be handled by the first due with a little help, so I rolled over and went back to sleep. Sorry about the lack of images lately! We had a wicked stretch with a fire, or two, almost every day! And now it has gone really quiet. Of course, as you well know, this is a temporary condition ;^)

If "Extreme Makeover: Home Edition" can build a home in seven days,
the Fire Department's contractors can probably have those stations
done before Hallowe'en, eh? <g>

> Do you miss dispatching??????Herman D. doesn?t!!?

I didn't miss it at all for just over four years, then I took a
part time dispatching job with a small private ambulance company
to help pay for incidentals, like groceries and gasoline. (!)

I won't go any farther than that, since it's completely off the
topic.

Ed, I have heard several plan versions, so here goes! Sta 35 near Blossom Hill and Cottle, probably will get T18 and RM 18, with no engine initially. Maybe even have Batt 13 move there. Sta 33 gets a new engine. Sta 34 on Las Plumas would temporarily become Sta 2 while 2 is either remodeled or razed/rebuilt. Then Sta 2 equipment would move back to their □new□ station 2 and then 34 would be available for staffing. I think the new training center will be at 34 also. Even heard a rumor that a new comm center would also be there. Also heard Batt 2 would move to a newly built and relocated Sta 21.

New stations 12 (my first in) and 17 combined bid were accepted this month. Sta 12 cannot move to its new location until Sta 35 is occupied, due to the run distances. I notice that Sta 13 is having work done along its southwest side, which had been talked about to house either the new tiller aerial or the present USAR company, with cross staffing either as needed. Maybe that rumor is true!? A roof extension and walls would make this happen, although it looks like a back-in space vs drive thru.

Remember, what I said above is only from conversations with various SFJD personnel. John W.

Two-alarm Sunnyvale condo fire extinguished
Bay City News Service
Article Launched: 03/18/2007 09:09:56 AM PDT

SUNNYVALE - A two-alarm fire erupted at a two-story condo in Sunnyvale at 553 Manet Terrace, just off of East Fremont Avenue at around 4:30 a.m. today, according to Sunnyvale city spokesman John Pilger.

When police and firefighters arrived, Pilger said they found flames bursting through windows of one condo apartment that was attached to six others.

{{{{{Pilger said that the city of Sunnyvale doesn't have its own fire department, so firefighters from surrounding areas were joined by Sunnyvale police, who donned fire gear to battle the blaze.}}}}}

According to Pilger, the flames were contained to one upstairs unit that sustained heavy smoke and fire damage.

The fire was brought under control at around 5:30 a.m. and did not cause any injuries, according to Pilger.

Pilger does not yet know what caused the fire or how many people may have been displaced as a result, and said he is still trying to contact residents who may not have been home at the time.

It sounds like at least one person (the writer? the city official?)
is completely ignorant of the Sunnyvale Department of Public Safety
and how it operates.

I have to admit, it IS somewhat unusual to arrive at a fire scene
to see one or two engines and several patrol cars with their trunk
lids open.

Sounds like something you would read on Bayscan with all its misinformation. Seems someone needs to tell mr pilger or the person at baycity news
just how Sunnyvale works.

Maybe next time it could read , Sunnyvale has police incident but NO police dept so the firefighters all help catch criminals with axes and hoses
while surrounding agencies chase criminal :-)

BTW , I montiored this fire and NO Mutual aid rolled on it. ALL Sunnyvale Fire units

BCN48 -CORRECTION

In the third graf of FIRE-FOUGHT (BCN44), a comment made by city
of Sunnyvale spokesman John Pilger was misstated.
According to Pilger, the city's Department of Public Safety
incorporates both police and fire units, and each public safety officer is
trained to perform both functions. Additionally, Pilger said, no mutual aid
from other cities was called in this fire.
An updated version of the story will follow shortly.

813. SJFD Level 2 High Rise

Yahoo group: BayAreaFire
Date: 2007-03-28 02:18:11 UTC
From: Craig Rose
Topic: 813 Message: 813

San Jose is working a Level 2 High Rise at 99 Almaden Avenue in the Union Bank building. This is taking place in an area very congested with traffic for the Sharks game starting at 7:30 p.m.

Initial report was smoke on the sixth floor followed by smell of smoke in the HVAC and elevator shaft.

Units Assigned:

TRUCK COMPANY 1
TRUCK COMPANY 3
ENGINE 1
ENGINE 30
ENGINE 3
ENGINE 8
ENGINE 7
TRUCK COMPANY 2
TRUCK COMPANY 9
USAR COMPANY 5
AIR 6

From: Craig Rose
Topic: 818 Message: 818

Hey folks. Thought I'd pass along a few photos of one of the new brush patrols that SJFD has received. Not the best shots, but gives you an idea of what you'll see in the hills this summer.

See the three shots in the photos section under SJFD New Apparatus. I'll post additional pics of the upcoming deliveries as they arrive.

33 is a gread design. Very Modern yet still looks like a fire station. I was half temped to don my hard hat and take a walk around except I had my San Jose Fire Dept shirt on and I didn't wanna make anyone think I was someone I wasn't. I also like the street name. Someone knew what they were doing and that's very honorable of whomever came up with that name for that street.

What I found amuzing was that when I was leaving 25, Batt 29 was rolling up to see it. When I was rolling up to 34, USAR 16 was just departing. They are all excited! I would imagine 25 & 33 would be done by late June, and the others, late July early August. I've been on enough construction sites to know that if you have all the exterior done, the interior is not far behind.

Hey Ed,

Nice to have some messages from you! I am off today and just returned back to my home in Santa Clara. The smoke from the Redwood City fire is very strong down here right now. Not much else to report as it's been quiet in this part of the woods for a few days now. But we all know how that goes.

By the way, for those interested, here is a link to a shot of the motor coach being used for the America's Fire Heroes Whistle-Stop Tour. Very dignified and inspiring design.

Hope I have my facts in order. Stations 33, 13 and 16 get the three new Ferrara engines. I hear that another request for bids has been put out for additional engines, but I am not sure the quantity at this time.

As for the ARFF rigs, none of them are out of service, but 20C is sitting in reserve at this point. Word is that some folks would like to retire 20C and replace her with another Oshkosh Striker. Let me tell ya, the Striker is an awesome rig with speed to burn. We'll see how all of that turns out.

Last May when I set up our Fire Associates meeting at SJFD Sta 20 (airport), we got rides in the first snozzle crash rig. It really accelerates; we took off across the ramp and runways and drove around the perimeter. Nice to see upgrades there. My son tells me a chartered Boeing 747 from Japan is supposed to land at SJC on April 27. However, for takeoff, they will depart OAK due to the gross weight for the return trip, he says. John

842. CDF Numbering question...

Yahoo group: BayAreaFire
Date: 2007-04-24 01:13:44 UTC
From: wireman1771
Topic: 842 Message: 842

Ok so I know that CDF uses the 4 digit numbering system, and I know that the first 2 numbers identify the unit.

What happens when you only see 3 number for the unit.

This past weekend I was traveling south on Highway 99 through Modesto and saw B420 on a CDF Battalion truck. Anyone have any clue about this?

I've also seen a CDF vehicle with F309 on it.

CT

From: Jim Acker
Topic: 842 Message: 843

I'm sure I will be corrected on this if I am wrong, but- when I worked for CDF the 3 digit numbers were used by the region office personnel.

Another possibility may be a unit that is assigned to a contract fire district and it is just part of a county numbering system outside of the statewide resource numbering system.

844. [SJFD] Tier 3 Wendover IC

Yahoo group: BayAreaFire
Date: 2007-05-05 22:00:39 UTC
From: Craig Tomasello
Topic: 844 Message: 844

San Jose is working a Tier 3 in the Evergreen/Silver Creek area of San Jose...

Batt 2 IS NOT requesting CDF Mutual Aid at this time.

Some of the units I'm sure are on this call:
E18 E31 E11 E2 Pt 2 E19 Pt19 E21 Pt 21 E24 Pt24 E27 Pt27 E13 WT13
Patrol Groups 5a 5b Patrol Group 1a 1b
B2 B13 B1

Tier 3 Units:
E28 Pt28 B10 Patrol Group 3a 3b

Hear it all on Command 3: 154.115

845. [SJFD] Tier 3 Wendover IC 1503 Update

Yahoo group: BayAreaFire
Date: 2007-05-05 22:08:44 UTC
From: Craig Tomasello
Topic: 845 Message: 845

Ok so here's a little more info,

Since someone asks every year: a TIER is a TACTICAL INTEGRATED EMERGENCY RESPONSE.

IC is at Wendover at Chandlen Ct. which is off of Nieman Av which is between Aborn and Yerba Buena Rds.

Units assigned to their specific TIER:

Tier 1
E24 E19 E2 B2
Tier 2
E27 E21 E18 WT 18 PT3a 3b B1 B13
Tier 3
E28 B10 E13 WT13 MED30

IC seems confident they can get this under control despite homeowners feeling very threatened. It is very windy down here in San Jose, and it is making it tricky.

I checked the dispatch log on FIRESCAN.NET and there was no record of CDF dispatching an engine to the fire. Usually they won't when it's well within SJ city limits due to it being LRA and the cost of "renting" CDF time.

Batt 2 specifically told SJ dispatch to hold off on CDF mutual aid.

Rose, excellent pics as usual!

849. RE: [BayAreaFire] [SJFD] Tier 3 Wendover IC 1503 Update

Cal Fire (old CDF) was not dispatched on this fire. I was there with Fire Support Unit 2 and also saw Craig riding with Safety. Natural bare earth across the head was what stopped the spread. Many homes were threatened but had the proper roof construction. Only grass, no shrubs so it was easy to put out and overhaul. John

SJS has this! In San Jose they never really seem to call CDF but I am sure there is a CDF engine there they always ask fro CDF unless its right outside the city.

Craig Tomasello <wireman1771@...> wrote:

Ok so here's a little more info,

Since someone asks every year: a TIER is a TACTICAL INTEGRATED EMERGENCY RESPONSE.

IC is at Wendover at Chandlen Ct. which is off of Nieman Av which is between Aborn and Yerba Buena Rds.

Units assigned to their specific TIER:

Tier 1

E24 E19 E2 B2

Tier 2

E27 E21 E18 WT 18 PT3a 3b B1 B13

Tier 3

E28 B10 E13 WT13 MED30

IC seems confident they can get this under control despite homeowners feeling very threatened. It is very windy down here in San Jose, and it is making it tricky.

Hi John and the group -

In retrospect there was really no need for CDF on this incident. It was nice to see the vast majority of homes in this area sporting defensible space and using appropriate materials for fire safe construction. Of course there were a few oddball structures, but overall this was a wind driven fire that in some older neighborhoods could have done tremendous damage.

I was in some of the homeowners backyards (with permission) and every one of them had tons of defensible space. Good work by all involved!

The property at the north east corner of Blossom Hill Road and Coniston Way (nearly across from Pioneer High School) is now sporting a construction trailer & some earth-moving equipment, so it won't be long before they start to pour concrete for the foundation of (the new) Station 17.

You would think the public would be informed of the formal ground breaking ceremony. I live 2 blocks from the new 12 and knew nothing about the ceremony until radio traffic revealed it!! Then it was too late.

Glad you brought that up John,

The CSJ Capital Improvement Projects list doesn't reflect either project being in Construction Phase. I think they're a little slow getting the info out, or , the project managers aren't keeping up on the status of the jobs like the city wanted them to be (i.e. a daily or weekly update on the jobs). Which I don't blame the PM's for not updating like they should because really their job is to be a PM and build the building as best as and as cheap as possible.

Still, would have been nice to have known, so we can get some cameras out there.

858. SJFD Two-Alarm Fire Images

Yahoo group: BayAreaFire
Date: 2007-05-14 02:30:01 UTC
From: Craig Rose
Topic: 858 Message: 858

SJFD worked a two-alarm structure fire on Lincoln Avenue in the heart of Willow Glen yesterday. The single family dwelling suffered significant damage (est. $400,000), but firefighters were able to achieve knockdown on this blaze within 12 minutes. With three exposures, crews did one heck of a job considering the wind was a threat during the course of the event. Kudos go out to Truck 4B, Engine 4B, Engine 3B, and especially Engine Company 6B companies!

Craig...

Interesting side note to this story. I went to my window to see if I could see any smoke from the car fire/fatal accident on Yerba Buena Road -- I live in the Evergreen area. As I looked north out my upstairs window, I could see smoke coming from the hills way north of my location. I had heard no radio traffic about a grass fire in that area, so I called SJFD Dispatch and asked Jennifer if anyone had reported the fire. She asked if this might be smoke from the Yerba Buena incident and I said, "No, this is in the hills way north of my location...maybe in the Alum Rock Park area. Have someone from Station 2 go out and look...They'll see it!" Anyway, it wasn't long before someone else reported it and they dispatched a Tier 1 to an exact location. Interesting that I was the first to call and I was at least 5 miles away. I did my good deed for the day!

889. New Photos - Vehicle Fire

Yahoo group: BayAreaFire
Date: 2007-06-21 19:08:30 UTC
From: Craig Rose
Topic: 889 Message: 889

For those interested...

http://tinyurl.com/22ecue

This was the result after a 16 year-old "borrowed" his dad's SUV and tried to take a 90 degree turn at 45 mph. Shortly thereafter a motorcyclist attempted to get across high voltage lines that had come down after the SUV sheared a utility pole. Even more interesting is the fact that the power lines fed into a large warehouse that is made of corrugated metal! All-in-all this was recipe for disaster. Thankfully no one was injured and the biggest challenge was the hazmat aspect of the incident. The power pole that came down had a large transformer on it that caught fire and exploded leading to concerns over toxic materials being released.

Cheers!

Craig R.

Hey John,

The Guadalupe fire is just about done. Contained with SJFD, CAL FIRE, Santa Clara County. They hit it hard and kept it small.

The image is from a fire in the South Lake Tahoe area, on the California side, that is just ripping. No report as of yet on acreage, but last I heard there were 12 homes destroyed.

897. [BayAreaFire] Lake Tahoe Fire****Angora Fire*****

Yahoo group: BayAreaFire
Date: 2007-06-25 01:23:23 UTC
From: Mobile11@aol.com
Topic: 897 Message: 897

June 24 at approximately 3pm: The Angora Fire is burning in the Lake Tahoe Basin Management Unit in the North Upper Truckee area near the Tahoe Paradise Subdivision, south Lake Tahoe. Some of the air tankers working the Angora Fire are operating out of the retardant base at the Minden Interagency Fire Center. A large plume from this fire is visible from the Sierra Front and affecting air quality in the area. This incident is being managed by the Camino Interagency Command Center, for fire information contact 530-647-5220.
*** June 24 at 4:30pm: Fires in the area have produced large volumes of smoke that is affecting the communities of the Sierra Front. Fine particulates in the air may create unhealthful conditions for area residents, particularly the elderly, very young, and those who suffer from respiratory ailments. Affected people should avoid outside activities if possible and seek medical attention for breathing difficulties. This evening and tonight smoke is likely to settle into low areas and may affect visibility along area roadways. Drivers are urged to exercise caution and use headlights when traveling in smoke impacted areas. Also, the ambient smoke will make the detection of new fire starts more difficult so please continue to comply with the fire restrictions that have been in place since June 1. ***

905. [CAL FIRE] Croy IC 18:43

Yahoo group: BayAreaFire
Date: 2007-07-02 01:45:53 UTC
From: Craig Tomasello
Topic: 905 Message: 905

I don't have acerage for this fire as SCU was dispatching 3 separate fires when this came across the air waves.

Frequencies to monitor for Croy IC are:

SCU Local 151.445
Command 1 151.355
Command 2 151.265

All I can say is that resouces are stretched super thin since there were 3 fires in SCU, one in BEU, and now a new one in LNU. Extra tankers were diverted from this fire to St. Helena for a new incident in LNU. Copter 104 also back to Napa Airport for fuel from the Finley Incident in Danville.

According to Engine 30, first on scene, this is a large two story single family dwelling under construction. Initial size-up was 90% involvement of the second floor. Multiple lines have been pulled and sounds like this one will be wrapped pretty quick.

Fire Associates responded at 20:49. We were on scene until a little before 23:00. It was one of those Saratoga locations where there was more equipment than there was street! Firefighters told us that the under-construction home was approx 15,000 sq.ft. in size. They made a good stop.

SONOMA AND MARIN COUNTIES-SAN FRANCISCO-THE EAST BAY HILLS-
SANTA CLARA COUNTY-LOS PADRES NATIONAL FOREST-
THE SALINAS VALLEY AND PINNACLES NM-NAPA COUNTY-
SANTA CRUZ MOUNTAINS-SAN MATEO HILLS-
937 AM PDT TUE JUL 10 2007

...RED FLAG WARNING IN EFFECT UNTIL MIDNIGHT PDT TONIGHT FOR DRY
LIGHTNING..

THE NATIONAL WEATHER SERVICE IN SAN FRANCISCO HAS ISSUED A RED
FLAG WARNING...WHICH IS IN EFFECT UNTIL MIDNIGHT PDT TONIGHT. THE
FIRE WEATHER WATCH IS NO LONGER IN EFFECT.

A RED FLAG WARNING FOR DRY LIGHTNING HAS BEEN ISSUED FOR THE
ENTIRE FIRE WEATHER DISTRICT. DRY THUNDERSTORMS ARE EXPECTED TO
DEVELOP BY MIDDAY OR EARLY AFTERNOON ACROSS THE HILLS OF MONTEREY
AND SAN BENITO COUNTY. THE STORMS WILL THEN MOVE NORTHWARD INTO THE
DIABLO RANGE AND EVENTUALLY THE NORTH BAY HILLS. STORMS WILL
INITIALLY BE DRY WITH DRY LIGHTNING STRIKES LIKELY. BY THIS
EVENING THE STORMS WILL TREND WETTER WITH A MIX OF WET AND DRY
LIGHTNING STRIKES PROBABLE.

IN ADDITION TO THE LIGHTNING THREAT STRONG AND GUSTY WINDS CAN BE
EXPECTED NEAR ANY THUNDERSTORMS THIS AFTERNOON AND TONIGHT.

A RED FLAG WARNING MEANS THAT CRITICAL FIRE WEATHER CONDITIONS
ARE EITHER OCCURRING NOW...OR WILL SHORTLY. A COMBINATION OF
STRONG WINDS...LOW RELATIVE HUMIDITY...AND WARM TEMPERATURES WILL
CREATE EXPLOSIVE FIRE GROWTH POTENTIAL.

Craig, because of this, I spent 11 hours Wednesday in Copernicus Lookout watching for fire starts from the Tuesday night dry lightning. There were something like 12 strikes that concerned Cal Fire. We couldn't spot anything and neither did Copter 106 doing recon flights. It was an interesting day since I had never done anything like that before. John

Mutual Aid requested from :

Santa Clara Fire 1 BC to Station 1
County Fire 1 BC to Staton 13

And they even give the damn lock box combo on the radio!

927. Remillard Ct. - 7:35 PM

Yahoo group: BayAreaFire
Date: 2007-07-17 02:35:48 UTC
From: Craig Rose
Topic: 925 Message: 927

No trouble, looks like the Remillard Ct. fire is getting knocked down. Just to fill everyone in, there was a report to PD of a male in full camo carrying a rifle running toward the fire. No one has been found at this point and an alert was issued twice for all companies to be aware of the situation. Nothing further on this.

Hey CT,
The reserve rig is there because they have not had the training for the new rig yet. But San Jose brought the new 33 to the COCO Firefighters memorial service. I saw them after because I was working the Grandprix. As for the tiller station 35 will be the first one with a tiller. And it should be new not older. Hope that helps

Okay, here's the deal. We purchased an old tiller for training to prepare for the arrival of two new tractor drawn aerials being assembled by Crimson Fire (Spartan) in Brandon, South Dakota. The two aerials are currently in the process of having their bodies assembled and placed on the chassis.

Then there are the three Ferrara pumpers. They are assigned as follows:

ENGINE 33 (Communications Hill)
ENGINE 13 (Pearl Avenue)
ENGINE 16 (South King Road)

So far, reaction to these new Engines has been really positive. There are the usual breaking-in issues, which usually leads to a slime green Pierce from BFO sitting in the barn.

Hope that helps!

A couple of weeks ago, SJFD changed their assignment areas over to the new "as if" configuration. "As if" meaning, as if the 3 new stations were already open. This eliminates the hassle of changing the run areas each time a new station comes on line. When Station 33 opened, they changed the entire city's assignment areas all at once, which will eliminate the hassle of changing again when Station 34 opens and again when Station 35 opens up.

955. [BayAreaFire] San Francisco - Dispatch Command

Yahoo group: BayAreaFire
Date: 2007-08-25 20:22:32 UTC
From: Erik H
Topic: 946 Message: 955

Just got back from taking a POST exam in San Francisco. They had us in some really neat command center type room. Had tables set up for various aspects, planning, construction, mass fatality, health, etc. All desks had a series of dedicated phones, and or radios.

I was at one of the Health tables, and had a portable radio on a charger in front of me, phones labeled Mental Health, Emergency Medical, and Health & Safety.

Outer walls all lined with White Boards, maps of the city all around, some showing locations of public warning sirens placed throughout the city.

I noticed a tone (or DC) remote with a separate numeric keypad attached. Had a chart with the sequence for various agencies, or button for an all broadcast.

Various simplex systems around, some phone looking things that were labeled "800 Mhz, All Talk Groups", I had a quick look at them, and they had almost every trunked system in the area programmed in.

Separate dedicated fax machines for incoming and outgoing faxes. Giant plotters, and some of the biggest printers you'll ever see.

CCTV for the bay was in the room.

It was pretty impressive stuff. Anyhow....I'm off to the State Fair to relax and enjoy my weekend!

-Erik

Well, guess we need some clarification on this one. I'll do some snooping and see what I can come up with.

Maybe I can shed some light?! A few weeks ago while at a Tier fire with a Support Unit, I had a long chat with a senior Captain in B13's area, and other inputs over the weeks.

I offer the following: An engine OR truck would be at 35 initially. A move of BC 13 to 35 is possible in the future but it involves changing most of the BC residences due to the averaging of stations within the city among the existing BCs. B13 is already the one with most stations, even before 33 opened; 35 adds another (one idea; move B29 to 5, 1 to 26, 13 to 35, eventually 2 to the SE). Also the tillers would be 1 and 13, with USAR 13 becoming a reserve USAR. Maybe a Brush Patrol or water tender would be in 35. Also put some rig into 34 to prevent further vandalism until the initial crews reside there.

One more tidbit - there is talk of placing the new "COMM VAN" at Station 33 (Communications Hill). Not sure if that decision has been made just yet. By the way, for those that haven't seen it, the new COMM VAN is quite cool!

Hey, that makes good sense! There is already some "antenna height" just by having the darn thing parked on the hill. I have been stating that advantage to others for several months.

Hmm sounds complicated. I know they made 35 a Bat Chiefs quarters and space but I guess will see. 35 getting a brush with 27 and 12 and 18 and 13 have tenders so I dont see that happening I could see 13 getting bp to go with the tender if the chief moves but like I said we will all see

Date: 2007-09-05 04:55:02 UTC
From: Craig Rose
Topic: 980 Message: 980

Hey guys, I just arrived back home from the Lick Fire about an hour ago. Latest news from Coe Park is that the fire has a good shot of burning southeast all the way to Highway 152. The winds today were gusting to 30 MPH and the forecast for tomorrow is not promising. We had one FF injury - succumbed to heat and suffered smoke in inhalation and was airlifted out and sent to Regional for care.

Today crews from State Parks worked to clear grass away from the visitor center, while numerous additional strike teams arrived at the incident. Tanker 910 dropped in again today for a late day run.

910 Tanker pulling up from his run on one of the flanks of the Lick Fire

http://i13.photobucket.com/albums/a266/carosephoto/IMG_7688.jpg

Column of smoke from the Lick Fire - note pyro cumulus clouds forming at the top.

http://i13.photobucket.com/albums/a266/carosephoto/IMG_7688.jpg

Another dozer transport arrives at Coe Park HQ

These freqs are shared by CDF and USFS on incidents. Each use has to be approved by North or South Ops. Other freqs may also be used as authorized by the FCC/FAA. All are for Air-Air operations except one; it is used for Tanker Base Ground Control/Operations. There are typos in three freqs listed here.

Brian, haven't seen you at the last few SC County multiple alarms. John, FASCV

989. Lick Fire Photos

Yahoo group: BayAreaFire
Date: 2007-09-08 16:36:20 UTC
From: Craig Rose
Topic: 989 Message: 989

Hey folks...here is a link to a few shots from day one of the Lick Fire.

http://tinyurl.com/397f48

I did not do anything within the perimeter of the fire since there
was such a massive traffic jam getting in and out of the park on the
single immediate access. Hoping to finally get in there today if I
can hitch a ride with CAL FIRE.

Enjoy...

p.s. day two shots coming soon.

990. Interesting...

991. SJFD Station 17 progress Sept 28

Yahoo group: BayAreaFire
Date: 2007-09-29 19:29:11 UTC
From: Dave Schultheis
Topic: 991 Message: 991

I drove by the new & being improved Station 17 on Blossom Hill Road at Coniston Dr on Friday. The framing is up and other work was in progress at the time.

Since this is a fairly small lot, they had to shoehorn a lot of stuff into the space and still leave room for employee parking.

The two main bay doors are pointed kind of south-east instead of opening right onto either the main street or the side street. This may be so that the rigs can sit in the sunshine and not block the sidewalk.

Sorry, no photos, but work is definitely progressing.

993. Is 34 open?

Yahoo group: BayAreaFire
Date: 2007-10-01 07:07:21 UTC
From: Craig Tomasello
Topic: 993 Message: 993

Does anyone have the status on 34?

Also as a side note it's weird hearing dispatchers dispatching into "35's area", still used to hearing 18 and 27s area. Exciting though to see new stations however.

SJFD.com needs to upstate station location map as well!

They are B1, B2, B10, B13, B29. If B13 is moved to 35, then the others will be relocated southward I am told. There used to be Div Chiefs but budget shortfalls killed that, I think. Now one of the 3 Deputy Chiefs, designated by shift A, B or C, would respond to a major incident.

Just got home and I was on Interstate 5 earlier and saw at least 7 strike teams heading South. CalFire,USFS,Local Dept's. Couldn't see all the numbers but CalFire 2100,2700,and 1400 (Lake -Napa) units were going and USFS E52, E49 and other USFS Engines PNF? and Crew Buses from Shasta and Numerous Chiefs and Utility trucks too. I was heading North.

It was pretty cool since cars were pulling over for them even though they had no lights on (Lightbars)

That was around 5:30 to 6:30

Had the white channel on but no radio traffic.

Hey Craig...

I am out of the County, hence no scanner available for listening. (Actually, I am sitting in a motel in Fallon, NV!) When you get a chance, fill me in on the details. I am familiar with the area. I will return home on Oct 30 or 31.

Also, I see that Fire Associates just got paged (8:57PM).

"A" strike teams are made up of Type 1 Engines
"C" strike teams are made up of Type 3 Engines

Central and Southern San Mateo County Strike tams (2276A and 2277A?)
returned 10/28.

XSF2251A from San Francisco and elsewhere returned tonight.

San Mateo North strike team (2275A?), another ST and the OES units are
still down South.

FYI: Seattle, WA FD also sent an engine to form a strike team from
their area.

Mutual Aid? not on a Third Alarm.

1033. Wildland Fire - Structures Threatened

Yahoo group: BayAreaFire
Date: 2007-11-08 00:12:20 UTC
From: Craig Rose
Topic: 1033 Message: 1033

Just had a mutual aid request come across County Red Net (33.960) for
a strike team of TYPE 1 engines for immediate need structure protection.

Last report was a 10-15 acre vegetation fire threatening multiple
structures in the area of Butch Drive and Bridle Path Drive.

MAP - http://tinyurl.com/39d8db

Strike Team consists of the following:

Santa Clara County Engines 3, 12, 13
Saratoga Engine 30
San Jose Engine 9

San Jose also has Engine and Water Tender 18 responding.

Monitor:

County Red - 33.960
CAL FIRE Command 2 - 151.265
CAL FIRE SCU - 151.445
Santa Clara County Fire - 154.250
CAL FIRE TAC 9 - 151.385

Topic: 1033 Message: 1034

Air Attack 430 advising Battalion 1604 that the fire is now at
approximately 75 acres with forward rate of spread alternating
between slow and moderate. Some heavier fuels are involved on one
flank, but most work to be handled by dozers working in the grass.

Two crews on order at this time.

STRIKE TEAM 9460C just arriving in the area to contact TRAINING 1608
in staging.

Santa Clara County Battalion 12 is the Strike Team leader for the
structure protection group.

1042. [SJFD] Cole IC 12:57am 2nd Alarm

Yahoo group: BayAreaFire
Date: 2007-11-19 09:01:06 UTC
From: wireman1771
Topic: 1042 Message: 1042

Probably the 1st post of it's kind. I am currently on scene on Cole Drive in the Cambrian area of San Jose. What's working is a 2nd Alarm fire in a home.

Initial Reports of a person trapped but nobody found. Since my arrival on scene I've hear several explosions from the residence. Flames shooting up 20 feet above the house. Well involved home.

1st Alarm:
E9 T9 E17 E13 USAR13 B10 B13 Med 30

2nd Alarm:
E14 T14 E4 B1 Air6

Viva broadband connect cards!

1043. Re: [SJFD] Cole IC 1:07am 2nd Alarm

Yahoo group: BayAreaFire
Date: 2007-11-19 09:09:38 UTC
From: wireman1771
Topic: 1042 Message: 1043

Fire pretty much knocked down, still smoking quite a bit, SJFD held it to the garage and E14 and E4 are released.

Good initial attact by Engine 9 prevented this fire from getting further than the garage. Hydrant out front too helped.

No more updated unless conditions warrant.

The Almaden Hand Crew is a group of "extra" CDF (CAL FIRE) personnel who don't have a spare engine to staff. They use a van, without code 3 equipment I believe, to respond. Based at CDF Station 22, located on McKean Road, near the end of Almaden Expressway in S San Jose. SCU had 16 engines staffed Saturday morning, with 7 of them in So Cal. John, CDF VIP

Yahoo group: BayAreaFire
Date: 2008-06-12 00:33:48 UTC
From: Craig Allyn Rose
Topic: 1078 Message: 1078

100+ acres with long range spotting up to 1/4 mile ahead of the main body of fire. Also request to have PG&E respond and secure a large portion of the power grid. Sounds like another long-term engagement.

Other items of interest include over 1,400 evacuated from the immediate area, and the column of smoke is clearly visible to the east here in the Santa Clara Valley.

From: John Whitaker
Topic: 1078 Message: 1081

My wife and I happened to be in downtown Santa Cruz when this fire started. Huge plume of smoke right from the start. We drove home via Hollister Airport.

We sat there from 6:30 PM until 7:00 PM and watched 8 different tankers load up. In order of appearance, the tankers were: 82, 86, 78, 96, 81, 80, 95 and 90 - all S-2T's. On the ground and inactive were two North American OV-10A Bronco airtactical aircraft - Air Attack 210 and Air Attack 120.

Some must have been supporting the "Indians" fire and others were obviously heading to Bonny Doone for the "Martin" fire.

It's been a long time since I've seen that many tankers cycle through in such a short time!

John Whitaker

Evening All!

As promised, a few images from the third-alarm commercial structure fire last night in Cupertino.

http://www.emergencyphoto.com/fire/saich/saich.htm

Also, for those interested in a little variety, check out my visit with the men and women of the London Fire Brigade's Chelsea Station right here...

http://www.emergencyphoto.com/fire/londonfire/london.htm

They went through a vertical rescue training scenario with a few twists and turns. Really excellent folks to spend time with.

Enjoy!
